Using TANDEM concealed runners

Step 1: Measure cabinet opening

These measurements are needed to determine drawer box size.

Panel cabinet

Frame cabinet

Step 2: Select TANDEM runners

Based on the application, choose the TANDEM concealed runner that fits the desired extension, drawer side thickness, weight capacity and cabinet depth. Then go to the corresponding catalog page for more specific information.

Step 3: Build drawer boxes

Build drawers according to the specifications given for the TANDEM runners you chose and the measurements determined in Step 1. Install appropriate locking devices and bore holes to accept rear hooks.

Step 4: Attach runners to cabinet

Using the mounting information given for the TANDEM runners you chose, mount the TANDEM runners in the cabinet.

Step 5: Insert drawers

Place the drawer on the runners and close. The locking devices automatically engage with the runners. Make height and tilt adjustments if necessary.
Drawer preparation

Rear notching

Dimensions

Drawers must be notched in the back to accommodate TANDEM runners.

Option - no notching

Make the back panel shorter and extend the drawer bottom to the back of the drawer.

The notches must be flush with the drawer bottom.

Drawers must have 6mm holes drilled in the back panel to accept the hooks in the back of TANDEM runners.

Rear boring

Dimensions

Drawers must have 6mm holes drilled in the back panel to accept the hooks in the back of TANDEM runners.

Boring

1. Place the template over the drawer side
2. Position the template so that the center rib rests against the inside face of the drawer side
3. Set stop collar on 6mm bit so that it will drill 10 (3/8") deep
4. Hold template firmly and drill hole
5. Repeat on other side

Locking devices

Attachment

Mounting screws must go in at a precise angle to ensure proper function of the locking devices.

Note: Using the T65.1000.02 template is highly recommended
