

## FlexTape LED Buying Guide

The most flexible LED lights on earth, the FlexTape LED is loaded with many features such as an average life of 25,000 hours, peel & stick application & low heat generation.

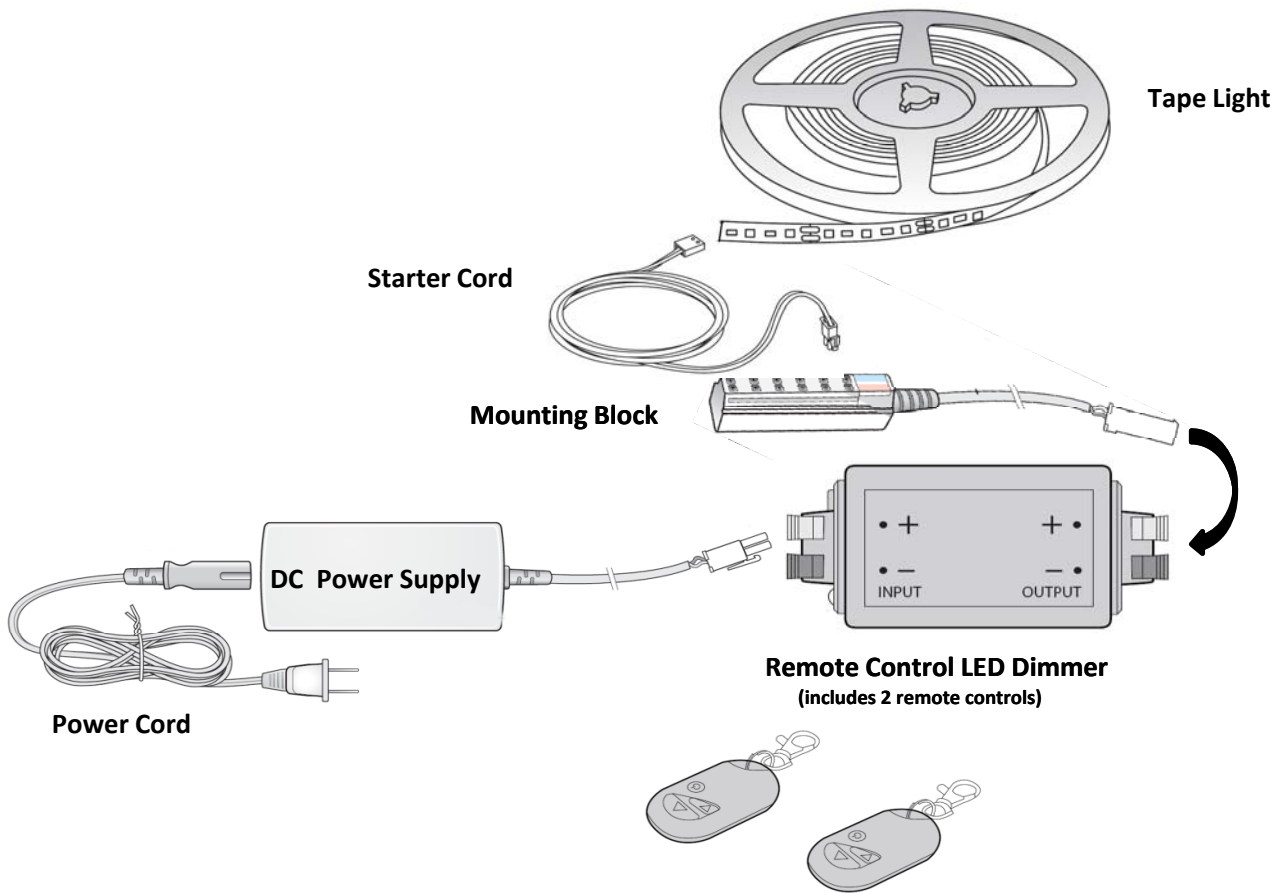

To design your FlexTape lighting system, start with the fixture. The FlexTape light is sold in a 20 ft roll. To choose your required DC Power Supply, add up the wattage of the desired length of FlexTape. For 20 ft of FlexTape, you would need a DC power Supply of at least 28 watts.

**FlexTape LED Non-Dimming System**

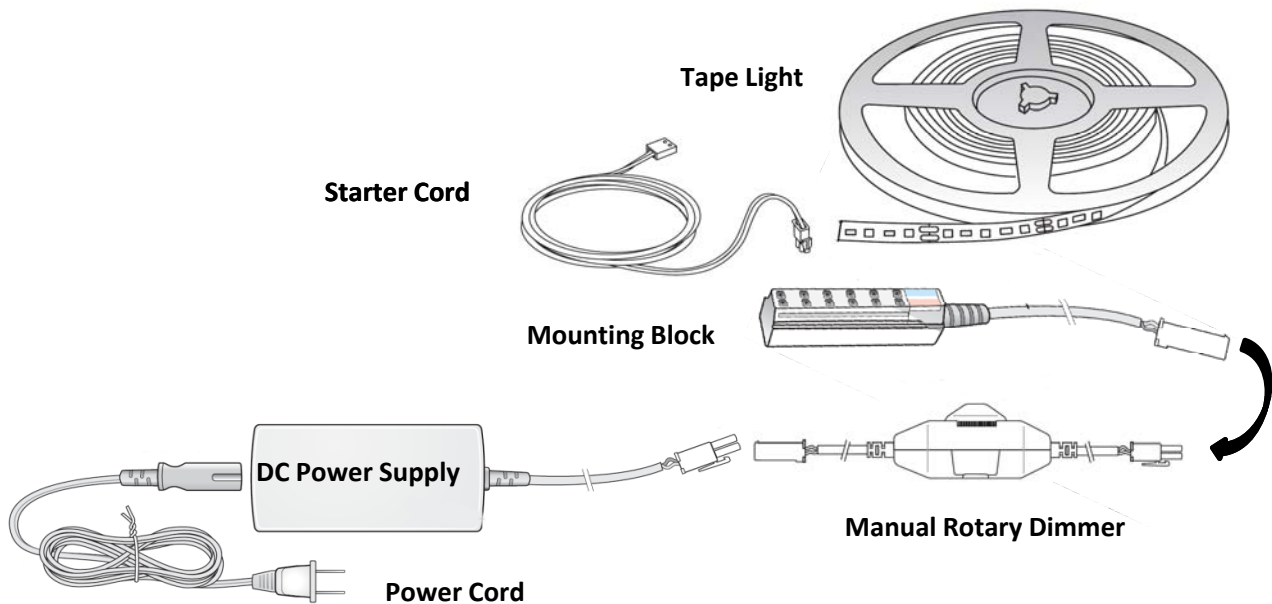

You have several options for light level control with this system. To use the Touch On/Off Switch (TRS-TS2-72) simply plug the DC Power Supply into the outlet on the Touch On/Off Switch, plug the Touch On/Off Switch into the wall socket, and locate the touch pad in the desired location.
