About Us

Founded in 1985, Task Lighting has been a lighting leader for 35 years and operates a 35,000 sq. ft. manufacturing facility in Kearney, Nebraska. Task Lighting is part of Dimora Brands.

Dimora Brands operates leading brands in cabinet hardware, door hardware, faucets, lighting, accessories, and related products. Its two operating divisions, Top Knobs and Hardware Resources, are known for the industry's best product offering and service. Each Dimora Brands division proudly serves electrical distributors, lighting showrooms, kitchen cabinet dealers, kitchen and bath showrooms, custom cabinet makers, independent hardware stores, other customers, and the design community.

The Dimora Brands collection of industry-leading brands includes the following:

Task Lighting consists of 4 brands:

Pre-Assembled LED Lighting Fixtures

LED Tape Lighting, Tape Lighting Kits, Temperature Tunable Lighting, and Puck Lights

Angle Power Strip and LED Lighted Power Strip

Accessories for LED Lighting

Industry leader for 35 years

Task Lighting is an industry leader in professionally installed LED Lighting and the patented Angle Power Strip. Our manufacturing plant for assembled fixtures and Angle Power Strip fixtures is in Kearney, Nebraska.

Highlight beauty

Highlight the beauty of the home with our LED Lighting product lines – sempriaLED® and illumaLED™. Select between a variety of assembled fixtures, tape lighting, color tunable white tape lighting, puck lights, or specialty lighting to set the mood in any room.

Hide power

We offer a variety of Angle Power Strip products to neatly tuck up under cabinets, shelves, island countertops, and more to hide power. No more unsightly receptacles cut into an expensive backsplash or messily installed on the side of an island. Angle Power Strip and Lighted Power Strip fixtures are manufactured in our Kearney, Nebraska factory ensuring the highest quality.

Knowledgeable in-house staff

Our seasoned Design Services and Technical Support teams in our Kearney, Nebraska facility are always on hand to help you select product, answer technical questions on a product, provide a free product layout and quote, assist with installation questions, and more.

LED Lighting powered countertop display

This LED lighting powered countertop display comes complete with a Touch Dimmer Switch and plug-in power supply for you to carry around and plug-in to light up. Order a display from Task Lighting using part number DIS-LED2019

LED Lighting vignette display

Our LED Lighting vignette display is perfect on the countertop to remind customers of the benefits of premium quality LED Lighting. Order a display from Task Lighting using part number DIS-VIN-LED2019

Angle Power Strip vignette display

Our Angle Power Strip vignette display is a small, compact display board that showcases the difference Angle Power Strip products make keeping your backsplash clean. Order a display from Task Lighting using part number DIS-VIN-APS2019

Angle Power Strip countertop display

The Angle Power Strip countertop display is a larger display board for the countertop highlighting the ability to keep the beautiful backsplash and the island uninterrupted. Order a display from Task Lighting using part number DIS-VIN-APS2019

Display LED Lighting for free in your showroom

Purchase any Task Lighting products for a kitchen or closet vignette display in your showroom. Once you hit the pre-determined target purchase amount, you receive a full rebate on those products!

As always, products purchased for display in vignettes receive an additional 35% off of dealer price.

This rebate program includes all LED Lighting, Angle Power Strip products, and accessories offered by Task Lighting. Sell these products to earn a **FREE** display.

You have one year from date of purchase to hit the target purchase amount.*

Earn your rebate in 3 easy steps

- 1 Purchase products**
LED Lighting or Angle Power Strip
- 2 Achieve target purchase amount**
- 3 Receive a full rebate!**
on products purchased and earn a FREE display

The rebate structure is as follows

Display Cost	Purchases Within 12 Months to Get Rebate
\$0 – \$249	\$1,500
\$250 – \$499	\$3,000
\$500 – \$749	\$4,000
\$750 – \$999	\$5,000
\$1,000 – \$1,249	\$6,000
\$1,250 – \$1,500	\$7,000

Item number DISP-LTPWR must be added on any order that qualifies. When you hit your qualifying target purchase amount, you will automatically receive the rebate. It will appear in your statement under the item number REBATES-LTPWR.

*Not hitting the amount in 12 months will forfeit the rebate.

Custom fixture shown

Angle Power Strip

Angle Power Strip fixtures place hidden power right where you need it and are the perfect alternative to standard outlets that disrupt the beauty of your glass, tile, or solid-surface backsplash.

Tucked away electrical power, plus switches to control lighting, garbage disposal

Custom fixture shown

Position vertically along a bathroom mirror for unobtrusive convenient power

Custom fixture shown

Mount at the back of a desk or countertop for power at your fingertips

Install under the island countertop to avoid cuts for outlets in decorative end panels

Lighted Power Strip

The Lighted Power Strip combines sempriaLED® lighting with an Angle Power Strip to create the best of both worlds in lighting and power. Style and functionality come together in this sleek, multi-purpose fixture.

Angle Power Strip

Power at your fingertips, tucked out of sight

Preserve the beauty of the backsplash and the island

Made in the U.S.A. • UL Listed • 5 year warranty • 4 finish options
10 standard lengths from 9" to 72" • Add switches, USB charging, custom lengths

Electrical outlets mar the beauty of the backsplash

Preserve that beauty by installing an Angle Power Strip underneath the cabinets. Power at your fingertips, tucked out of sight!

Selecting an Angle Power Strip

Looking for an Angle Power Strip?

This selection guide will walk through how to select an Angle Power Strip perfect for any job. Don't see what you're looking for in the standard options? Contact Design Services at 866-848-9094 or e-mail DesignAndSupport@TaskLighting.com for help on customizing a Slim Profile (APT Series) or Duplex Receptacle (TR Series) Angle Power Strip.

STEP 1 Do you want Single or Duplex Receptacles?

Single Receptacle

APT Series

- Slim profile
- Multiple standard lengths and 15 amp receptacles
- Customize fixture with additional receptacles and switches, custom lengths, and receptacle/switch placement — call Design Services at 866-848-9094 for custom orders

15 Amp
Single Receptacle

Duplex Receptacle

TR Series

- Multiple standard lengths and 20 amp receptacles
- Customize fixture with additional 20 amp receptacles and switches, custom lengths, receptacle/switch placement, and more (see page 28 for more options) — call Design Services at 866-848-9094 for custom orders

20 Amp
Duplex
Receptacle

TR-USB Series

- Standard lengths only
- 1 – 15 amp USB/receptacle combo located on left side
- Duplex receptacle quantity and placement determined by length of fixture

15 Amp
USB/
Receptacle
Combo

20 Amp
Duplex
Receptacle

TRS Series

- Standard lengths only
- 1 – 15 amp switch/receptacle combo in 9" and 12" fixtures
- 1 – 15 amp dual switch device in 18" – 36" fixtures. Select right or left side for switch location
- Duplex receptacle quantity and placement determined by length of fixture

15 Amp
Switch/
Receptacle
Combo

15 Amp
Dual
Switch

20 Amp
Duplex
Receptacle

STEP 2 Select the desired standard length for the fixture

APT Series

- 9" APT9-2Color-P-Finish-Position*
- 12" APT12-2Color-P-Finish-Position*
- 18" APT18-3Color-P-Finish-Position*
- 24" APT24-4Color-P-Finish
- 30" APT30-4Color-P-Finish
- 36" APT36-4Color-P-Finish
- 42" APT42-5Color-P-Finish
- 48" APT48-5Color-P-Finish
- 60" APT60-7Color-P-Finish
- 72" APT72-8Color-P-Finish

*Position indicates Left (L) or Right (R) side wire entry

TR Series

- 9" TR9-1ColorD-P-Finish
- 12" TR12-1ColorD-P-Finish
- 18" TR18-2ColorD-P-Finish
- 24" TR24-2ColorD-P-Finish
- 30" TR30-2ColorD-P-Finish
- 36" TR36-2ColorD-P-Finish
- 42" TR42-3ColorD-P-Finish
- 48" TR48-3ColorD-P-Finish
- 60" TR60-4ColorD-P-Finish
- 72" TR72-4ColorD-P-Finish

TR-USB Series

- 9" TRU9-1ColorD-P-Finish
- 12" TRU12-1ColorD-P-Finish
- 18" TRU18-2ColorD-P-Finish
- 24" TRU24-2ColorD-P-Finish
- 30" TRU30-2ColorD-P-Finish
- 36" TRU36-2ColorD-P-Finish
- 42" TRU42-3ColorD-P-Finish
- 48" TRU48-3ColorD-P-Finish
- 60" TRU60-4ColorD-P-Finish
- 72" TRU72-4ColorD-P-Finish

TRS Series

- 9" TRS9-1Color-Finish
- 12" TRS12-1Color-Finish
- 18" TRS18-2Color-Finish-Switch*
- 24" TRS24-3Color-Finish-Switch*
- 30" TRS30-3Color-Finish-Switch*
- 36" TRS36-3Color-Finish-Switch*

*Switch indicates Left Side (LS) or Right Side (RS) switch location

STEP 3 Select the Finish Option with coordinating receptacle color

Things to keep in mind when selecting a finish: Blend with backsplash color to reduce fixture visibility, coordinate with cabinet color, or match nearby hardware.

APT Series - finish options with coordinating receptacle color (24" fixture shown)

NOTE: If a different finish / receptacle color pairing is desired, call Design Services at 866-848-9094.

Black (B) Receptacles
Black (BK) Finish

Black (B) Receptacles
Bronze (BZ) Finish

Grey (G) Receptacles
Satin Nickel (SN) Finish

White (W) Receptacles
White (WT) Finish

TR Series - finish options with coordinating receptacle color (24" fixture shown)

NOTE: If a different finish / receptacle color pairing is desired, call Design Services at 866-848-9094.

Black (B) Receptacles
Black (BK) Finish

Black (B) Receptacles
Bronze (BZ) Finish

Grey (G) Receptacles
Satin Nickel (SN) Finish

White (W) Receptacles
White (WT) Finish

TR-USB Series - finish options with coordinating USB/receptacle color (18" fixture shown)

NOTE: If a different finish / receptacle color pairing is desired, call Design Services at 866-848-9094.

Black (B) Receptacles
Black (BK) Finish

Black (B) Receptacles
Bronze (BZ) Finish

Grey (G) Receptacles
Satin Nickel (SN) Finish

White (W) Receptacles
White (WT) Finish

TRS Series - finish options with coordinating switch/receptacle color (24" fixture shown)

NOTE: If a different finish / receptacle color pairing is desired, call Design Services at 866-848-9094.

Black (B) Receptacles

Black (B) Receptacles
Bronze (BZ) Finish

Grey (G) Receptacles
Satin Nickel (SN) Finish

White (W) Receptacles
White (WT) Finish

Below are examples of Angle Power Strip part numbers. Customer choices, described in Steps 1- 3, are indicated in blue. Coordinating receptacle color must match fixture finish in Step 3, otherwise it is a custom fixture.

EXAMPLE APT PART NUMBER

EXAMPLE TR PART NUMBER

EXAMPLE TR-USB PART NUMBER

EXAMPLE TRS PART NUMBER

CUSTOM LENGTHS AND DEVICE OPTIONS

Contact Design Services at 866-848-9094 or e-mail DesignAndSupport@TaskLighting.com for help with custom orders

Custom lengths to the 1/4" from 7" – 92" (sizes over 92" available but will have a seam showing)

Additional devices and placement options available

Receptacles must be placed a minimum of 3" from each end of the fixture to the center of a receptacle and a minimum of 5" apart (from the center of one receptacle to the center of the next)

EXAMPLE FOR RECEPTACLE PLACEMENT

SWITCHES THAT CAN BE ADDED

Part Number	Description	Color
T-T-1Z-WC-RF-Color	TandemLED™ smart control wireless on / off / dimming controller – compatible with TandemLED™ products	B, G, W

24-1/2 in. fixture shown in Satin Nickel
with Grey receptacles and Grey switch
LP24QD8NDGSN30

Fixture
Cross-Section

APPLICATIONS

- Under cabinet
- Under fixed shelving
- Office cubicles
- Shops and garages
- Bathrooms

FEATURES

- Built-in power supply – direct replacement for a stand-alone fluorescent light
- High light output –400 lumens per foot at 3000K
- 4 watts per foot (1/4 watt LEDs)
- 90 CRI (Color Rendering Index)
- 15 amp tamper-resistant single receptacles
- Rocker switch included (Black, Grey, or White)
- Dimming requires a dedicated circuit for the lighting
- Fully assembled fixture with frosted, light-diffusing lens
- No Ultraviolet (UV) or Infrared (IR)
- 50,000 hour LED life at 70% lumen maintenance

Mount at back of cabinet

LEGEND

-  = 15 amp receptacle available in Black (B), Grey (G), or White (W)
-  = Divider Plate (Low Voltage)
-  = Knock-out (1-1/2" from right side – 5-1/2" from left side) located on back frame
-  = Low Voltage Entry (1-1/2" from left side) located on back frame

CUSTOM OPTIONS/DETAILS

- Custom lengths from 10-1/2" – 92"
- 120 volt integral switch (available in Black, Grey, or White)
- Custom receptacle/switch placement
- Receptacles must be a minimum of 1-1/2" apart (on center)
- Receptacles must be a minimum of 1" from right side & 5-1/2" from left side. **Knockout cannot be behind device.**
- Custom charges may apply — Call Design Services at 866-848-9094 for a quote, lead time, and assistance with your custom order

STEP 1 Do you want a Built-in or Remote Power Supply?

Built-in Power Supply

DV Series

Built-in power supply and rocker switch in each fixture
(available in standard lengths only)

- High light output (part number code Q)
- 4 watts per foot for the sempriaLED® Lighting
- Direct replacement for fluorescent fixture (no additional wiring)
- 15 amp tamper-resistant receptacles
- Available only in standard fixtures – no custom options

Remote Power Supply

RM Series

Remote power supply is installed in accessible location near fixtures
(custom options available)

- Higher light output (part number code H)
- 6 watts per foot for the sempriaLED® Lighting
- Best for powering multiple Lighted Power Strip fixtures that are in close proximity
- 15 amp tamper-resistant receptacles
- Customize with additional receptacles and switches, custom lengths, and receptacle/switch placement – call Design Services at 866-848-9094 for custom orders

STEP 2 Select the desired standard length for the fixture

DV Series (Built-In Power Supply & Switch)

- 10-1/2" LP10QD2NDColorFinishTemp
- 12-1/2" LP12QD4NDColorFinishTemp
- 18-1/2" LP18QD6NDColorFinishTemp
- 24-1/2" LP24QD8NDColorFinishTemp
- 30-1/2" LP30QD10NDColorFinishTemp
- 36-1/2" LP36QD12NDColorFinishTemp

RM Series (Remote Power Supply)

- 10-1/2" LP10HR3NDColorFinishTemp
- 12-1/2" LP12HR6NDColorFinishTemp
- 18-1/2" LP18HR9NDColorFinishTemp
- 24-1/2" LP24HR12NDColorFinishTemp
- 30-1/2" LP30HR15NDColorFinishTemp
- 36-1/2" LP36HR18NDColorFinishTemp
- 42-1/2" LP42HR21NDColorFinishTemp
- 48-1/2" LP48HR24NDColorFinishTemp
- 60-1/2" LP60HR30NDColorFinishTemp
- 72-1/2" LP72HR36NDColorFinishTemp

STEP 3 Select the Finish Option with coordinating receptacle color

Options to keep in mind when selecting a finish:

- Blend with backsplash color to reduce fixture visibility
- Coordinate with cabinet color
- Match nearby hardware

DV Series - finish options with coordinating receptacle and switch color (24-1/2" fixture shown)

NOTE: If a different finish / receptacle color pairing is desired, call Design Services at 866-848-9094.

Black (B) Receptacles

Black (BK) Finish

Black (B) Receptacles
Bronze (BZ) Finish

Grey (G) Receptacles Satin
Nickel (SN) Finish

White (W) Receptacles
White (WT) Finish

STEP 4 Select a Kelvin Temperature to fit the space

- 2700K Warm – Gold-toned light enhances stained wood, red and caramel cabinets, countertops, and backsplash; copper, gold, brass, or bronze hardware (Part number is 27 for 2700K)
- 3000K Soft – Soft light complements natural wood, warm grey and ivory cabinets, countertops, and backsplash; bronze, satin nickel, or gold hardware (Part number is 30 for 3000K)
- 4000K Cool – Crisp light provides a clean look for blue, green, and white cabinets, countertops, and backsplash; gun metal, pewter, or silver hardware (Part number is 40 for 4000K)
- 5000K Daylight – Bright white light intensifies the minimalist look of blue, grey, and white cabinets, countertops, and backsplash; silver, chrome, or black hardware (Part number is 50 for 5000K)

2700K - Warm White

3000K - Soft White

4000K - Cool White

5000K - Daylight White

Below are examples of Lighted Power Strip part numbers. Customer choices, described in Steps 1-4, are indicated in blue. Coordinating receptacle color must match fixture finish in Step 3 above, otherwise it is a custom fixture.

1. Refer to the RM Series Total Watts column on page 32 for the wattage load of each fixture
2. Add together the total watts for all fixtures to be controlled by the power supply
3. Select the power supply with wattage capacity equal to or higher than the load – do not overload power supplies
4. One dimmer may control multiple power supplies if desired.

Example:

Choose between the following power supplies:

60 watt Plug-in, or 60 watt Waterproof, or 60 watt Hardwired

Choose between the following power supplies:

36 watt Plug-in, or 60 watt Waterproof, or 48 watt Hardwired

Wireless Dimming

Wireless dimming is often used when running new wire behind the walls is challenging. A dimming receiver is wired between the power supply and the lights and it sends signals through RF (Radio Frequency) to the controller – no wires are required. The controller may be used like a remote control, or housed in a standard wall box with cover plate, or mounted under a cabinet, or located inside our TR Series Angle Power Strip.

Power Supplies for Wireless Dimming System

Plug-in and Waterproof Power Supplies

The Task Lighting plug-in and waterproof power supplies, are compatible with the Uno 1-Zone, Duo 2-Zone, Quattro 4-Zone, and WAV smart control wireless dimming systems. Any power supplies over 60 watts are UL Listed for commercial use only and are not UL Class 2 Listed for residential use.

PLUG-IN CONSTANT VOLTAGE POWER SUPPLIES

HARDWIRED CONSTANT VOLTAGE POWER SUPPLIES

Wireless Dimming Systems

The LED receivers allow you to control different zones of lighting using the Lighted Power Strip RM Series independently or in a group. Use with the wireless controller options below.

Uno 1-Zone LED Controller

The Uno 1-Zone LED controller. Allows you to control 1-Zone of lights with on / off / and dimming options. Use with T-Q-WR96 receiver or T-Q-WR240 receiver to control lights with only the wireless controller and no smart device options. Pair with the T-TWAV-WR-120 receiver to control lights with a wireless controller, paired to a smart home hub for voice control, or use the smart device app. Available in Almond (AL), Black (BK), Brown (BR), Grey (GR), or White (WT).

UNO

T-Q-1Z-WC-RF-WT

DUO

T-Q-2Z-WC-RF-WT

Duo 2-Zone LED Controller

The Duo 2-Zone LED controller. Allows you to control 2-Zones of lights with on / off / and dimming options. Use with T-Q-WR96 receiver or T-Q-WR240 receiver to control lights with only the wireless controller and no smart device options. Pair with the T-TWAV-WR-120 receiver to control lights with a wireless controller, paired to a smart home hub for voice control, or use the smart device app. Available in Almond (AL), Black (BK), Brown (BR), Grey (GR), or White (WT).

QUATTRO

T-Q-4Z-WC-RF-WT

Quattro 4-Zone LED Controller

The Quattro 4-Zone LED controller. Allows you to control up to 4-Zones of lights with on / off / and dimming options. Use with T-Q-WR96 receiver or T-Q-WR240 receiver to control lights with only the wireless controller and no smart device options. Pair with the T-TWAV-WR-120 receiver to control lights with a wireless controller, paired to a smart home hub for voice control, or use the smart device app. Available in Almond (AL), Black (BK), Brown (BR), Grey (GR), or White (WT).

Standard 120V AC Hardwired Dimming

Hardwired wall dimmers are typically used for new construction or remodeling jobs where the walls are open for wiring. They are installed in a single gang box or may be ganged with other switches.

T-DT24W-12V-HW

T-DT48W-12V-HW

Power Supplies for Standard Wall Dimmers

The Task Lighting Hardwired Power Supplies are compatible with 120V AC magnetic dimmer switches. Any power supplies over 60 watts are UL Listed for commercial use only and are not UL Class 2 Listed for residential use.

T-DT60W-12V-HW

T-DT120W-12V-HW

120V AC Magnetic Dimmer Use with RM Series ONLY

Single-Pole Magnetic Low Voltage Dimmer (DVLV-600P)

A single switch used to turn on / off / and dim lighting. Multiple power supplies may be controlled by one switch. Available in Almond (AL) Black (BK), Brown (BR), Grey (GR), and White (WT).

DVLV-600P-WT

What is the WAV™ Receiver?

WAV stands for Wireless, App, Voice. The WAV receiver can turn any of our LED Lighting products into smart home connected lighting that works with Amazon Alexa, Google Home, Phillips Hue, Apple HomeKit, and any Zigbee 3.0 compatible system.

Control LED Lighting with the WAV™ Receiver in three ways:

- Use with our Uno, Duo, or Quattro wireless controller
- Connect to a smart home hub and use voice control
- Use the smart home hub app to control lights from anywhere in the world!

Same kitchen set to different color temperature lighting

Tape Lighting tuned to Daylight White (5000K)

Works with Zigbee-enabled smart home hub products available from several manufacturers.

Personalize your lighting experience

Two wire tunable white LED Lighting

Tape Lighting tuned to
Warm White (2700K)

Tunable white light from Warm White (2700K) up to Daylight White (5000K) and any temperature in between

What is TandemLED™?

TandemLED, named for its unique two-wire (tandem) operation, is a patent pending, two wire, tunable white LED Lighting technology that adjusts LED lights from Warm White to Daylight White and anywhere in between.

Personalize lighting by time of day, set a mood, enhance lighting to perform tasks, all while maintaining high lumen output. TandemLED makes it simple. Installation is easy using industry standard two wires. Pair with our WAV Receiver for smart home control.

Benefits of tunable LED Lighting:

Health

Productivity

Color Tunable LED Tape Light – TandemLED™ Series

Color Tunable White LED Tape Lighting featuring TandemLED two wire technology with protective micro waterproof coating – IP65 rated
High light output – 280 lumens per foot (1052/M)

APPLICATIONS

- Under cabinet
- Interior cabinet
- Cove
- Outdoor

FEATURES

- Tunable white light from Warm White to Daylight White and all temperatures in between
- Color tunable and dimmable with required WAV receiver, can use smart controller
- Patent pending 2 wire TandemLED technology
- Field cuttable approximately every 1 inch
- 88 diodes per foot (1440 per roll)
- 16 ft. rolls of waterproof tape lighting
- IP65 rated protective micro waterproof coating
- 90 CRI (Color Rendering Index – true color)
- No Ultraviolet (UV) or Infrared (IR)
- 30,000 hour LED life at 70% lumen maintenance
- 3M™ 300LSE waterproof adhesive tape
- 12 volt DC plug-in or hardwired power supply required (order separately)
- Aluminum housings available (order separately)

TUNABLE WHITE KELVIN TEMPERATURES

 Tunable white light – tune from Warm White (2700K) up to Daylight White (5000K) and all temperatures in between

Color Tunable White LED puck light featuring TandemLED two wire technology
Medium light output – 190 lumens per puck light

APPLICATIONS

- Interior Cabinet
- Under Cabinet
- Display/Accent
- Over Sink
- In Architectural Niche

FEATURES

- Tunable white light from Warm White to Daylight White and all temperatures in between
- Color tunable and dimmable with required WAV receiver, can use smart controller
- Patent pending 2 wire TandemLED technology
- Easy direct wire connection
- Recess or surface mount
- Includes 3 lenses: 38°, 88°, and 120° optics
- 90 CRI (Color Rendering Index – true color)
- No Ultraviolet (UV) or Infrared (IR)
- 30,000 hour LED life at 70% lumen maintenance
- 12 volt DC plug-in or hardwired power supply required (order separately)
- 2-1/2" hole saw recommended for recess mount

Not sure what color temperature would look best?

TandemLED™ eliminates the need to select a color temperature for lighting before it is installed. Use any TandemLED™ branded lighting with the WAV Smart Control™ system. This provides Wireless control, App control, and Voice control to tune the lights to any white color temperature. And then change the color temperature of the lighting at any time. No more living life in one color!

WAV™ COLOR TUNING AND DIMMING SYSTEM

Part Number	Description
T-TWAV-WR-120	WAV 120 watt smart LED receiver turns any LED lighting product into a smart home compatible product. Allows you to use a wireless controller, an app, or voice to control lights. Use with TandemLED smart controller (T-T-1Z-WC-RF-Color) for tunable white light control.
T-T-1Z-WC-RF-Color	TandemLED smart controller. Control 1 zone of lights, tune the color temperature of the lights, dim lights and turn off / on. Use with T-TWAV-WR-120 receiver. Available in Almond (AL), Black (BK), Brown (BR), Grey (GR), or White (WT)

Free Task Lighting design services

Share your design with us and we'll help you bring it to life with light

- The Design Team will provide price options and a lighting layout with all the appropriate products and accessories you need based on your requirements. Contact our Design Team at 866-848-9094 or DesignAndSupport@TaskLighting.com

All Task Lighting products are UL Listed

Common power supplies and dimming options, wireless remote control and dimmer, switches, and sensors

Reach Customer Service at 800-445-6404 during our extended business hours
7:00 am – 6:00 pm Central Time

Key Benefits – sempriaLED® Assembled Lighting Fixtures

Pre-assembled LED Lighting

- All LED fixtures are fully assembled in our Kearney, Nebraska factory
- Assembled LED fixtures are UL Listed and marked as such on the exterior of the fixture, which pleases electrical inspectors and simplifies sign-offs

Faster installation

- No fixture assembly at the job site saves time and means no missing parts
- No special connectors are needed, making for a clean installation, no extra jumper wiring to hide, and reducing the parts count on the project

Premium features your customer will notice

- Light output is measured in lumens per foot - sempriaLED lumens per foot are higher than standard products on the market
- Consistency of light output between fixtures and consistency of light color between fixtures results in a uniform look that's so important to customers
- The industry's first entirely "No Dot" LED Lighting product line producing an even glow of light on countertops.

Achieve great results using suggested LED fixtures designed for specific applications

- LED fixtures that are specifically recommended for under cabinet lighting, in-cabinet lighting, cove lighting, toe kick lighting, closet rod lighting, etc.
- Custom options available in quantity — we manufacture in Nebraska, so we can!

Price by the Foot pricing makes it easy to specify, quote, and sell sempriaLED light fixtures

- Contact our Design Services team for under cabinet lighting priced by the foot. We will provide a layout and three price levels for your consideration
- Makes it easy to accurately quote lighting to your customers without a parts list

Expect very long life

- Rated for 50,000 hours at 70% output (use 8 hours a day for 17 years)
- All sempriaLED fixtures are 100% tested in our Kearney, Nebraska factory, and this assurance of quality construction allows us to offer an industry-leading 5 Year Warranty

Key Benefits – illumaLED™ Tape Lighting & Puck Lights

Fast and easy to install

- Tape lighting is fast to install – just peel and stick using the pre-attached 3M™ 300LSE waterproof adhesive tape, or easily stick in an aluminum housing for a more finished look
- Use what you need - cut tape lighting to length for a perfect fit
- Task Lighting illumaLED kits provide all the parts for the job, with links to video instructions

Install LED lighting in challenging areas

- illumaLED Tape Lighting is flexible and thin – it can be installed along a curved surface, tucked into a narrow space, or mounted alongside architectural features
- Use puck lights to focus illumination in specific areas

illumaLED Tape Lighting has a protective micro waterproof coating, which makes the tape far less susceptible to damage than uncoated tape lighting

- Most tape lighting on the market is uncoated and can be damaged by being bumped, washed, splashed, or dusted
- illumaLED Tape Lighting is protected by a micro waterproof coating with an IP65 rating, which helps protect the lighting components from water damage

Use indoor and outdoor

- The IP65 rating of illumaLED Tape Lighting is suitable for outdoor use, and recommended for applications like outdoor kitchens, decks, stair rails, etc.
- Even the 3M™ 300LSE adhesive tape is waterproof rated

Select your favorite color of LED lighting with specialized RGB tape lighting

- RGB tape lighting lets you choose among thousands of colors – select one color or multiple colors to create a mood, accent an area, and complement décor

Expect long life

- Rated for 30,000 hours at 70% output (use 8 hours a day for 10 years)
- 3 Year Warranty against defects in materials and workmanship

illumLED Tape Lighting is designed for easy installation with professional results!

Step 1. Connect Power Supply to Receiver

Step 2. Connect Receiver to Tape Light

Step 3. Mount Tape Light and Pair Controller

Save significant cost – your installation crew can easily install illumLED Tape Lighting

1. Plug the power supply into an existing electrical outlet hidden behind the microwave, refrigerator, dishwasher, or under the sink
2. Easily mount the receiver near the plug-in power supply
3. Run connection wire through cabinets by drilling a tiny 3/16" hole for feed-through
4. Use our simple connectors to easily join the lighting products to the wire
5. In less than 30 seconds, program the wireless controller for on / off / dimming
6. Mount the wireless controller in a wall box, directly to a flat surface, or use as a remote

A simple way to control your lighting

Use a 1, 2, or 4-Zone wireless controller and additional receivers to independently control lighted areas / zones for under cabinet, above cabinet, interior cabinet, and toe kick.

A simple way to add lighting to any space

- Mounted under the upper kitchen cabinets to light countertop workspaces
- Above the kitchen cabinets for attractive ambiance
- At the floor under kitchen cabinets for evening illumination
- Colored lighting on decks, in a bar area, bath, or spa to set the mood

No extra wire to bundle and hide. illumaled™ uses regular wire, not jumpers, so the wire between the lights can be cut to the exact length needed.

UL listed, with a 3 year warranty, and rated for 30,000 hours (8 hours a day for 10 years)

Learn more!

Ask your Hardware Resources representative for a product demonstration and about our display program.

Have us cut perfect tape lighting fixtures for any application

The illumLED Cut-To-Length program let's you select the type and length of tape lighting you want. We can even assemble in an aluminum housing! We custom assemble the fixture in our Kearney, Nebraska factory to your specifications. Ordering a Cut-To-Length fixture is as simple as 1 - 2 - 3!

1

Choose LED Tape Light and Kelvin Temperature

TandemLED™ Series	Color tunable white – higher light output at 2.93 watts per foot (280 lumens per foot) Cuttable approximately every 1"
Vivid Series	High light output at 2.8 watts per foot (220 lumens per foot) Cuttable approximately every 1"
Radiance Series	Medium light output at 1.5 watts per foot (120 lumens per foot) Cuttable approximately every 2"

2

Choose aluminum profile or choose tape light only option

L-007-FR	White 8mm EZ connectors on both sides of fixture
L-003-FR	2 foot wire leads on both sides of fixture
L-002-FR	2 foot wire leads on both sides of fixture
R-series	White 8mm EZ connectors on both sides of fixture
No profile	White 8mm EZ connectors on both ends of tape light

See page 114 for profile dimensions

3

Choose the length of tape or fixture desired

minimum length of strip or fixture with aluminum housing is 5" – maximum length is 79" See separate size specification chart for exact measurements available

TandemLED Series	Approximately 1" intervals
Vivid Series	Approximately 1" intervals
Radiance Series	Approximately 2" intervals

PLACE AN ORDER

To order Cut-To-Length fixtures call Design Services at 866-848-9094 or e-mail DesignAndSupport@TaskLighting.com, or use the Cut-To-Length order form under Resources on TaskLighting.com. Get connected with one of our friendly in-house Design Services staff members to order fixtures to your exact requirements.

FEATURES

- Perfect for custom cabinet lighting – above, under, or in cabinets, toe kick, cove, or display case lighting)
- Manufactured to fit the needs of any space
- IP65 rated protective micro waterproof coating on LED tape lighting
- 90 CRI (Color Rendering Index – true color)
- Dimmable (with compatible dimmer)
- No Ultraviolet (UV) or Infrared (IR)
- 30,000 hour LED life at 70% lumen maintenance
- 3M™ 300LSE waterproof adhesive tape
- 12 volt DC plug-in or hardwired power supply required (order separately)

Mount vertically between hinges

LED Tape Light – Drizzle Series

Tape Lighting with protective micro waterproof coating – IP65 rated
Lower light output – 49 lumens per foot (160/M) at 3000K

APPLICATIONS

- Toe kick
- Interior cabinet
- Cove
- Outdoor

FEATURES

- Field cuttable approximately every 4 inches
- 9 diodes per foot (150 per roll)
- IP65 rated protective micro waterproof coating
- 90 CRI (Color Rendering Index - true color)
- Dimmable (with compatible dimmer)
- No Ultraviolet (UV) or Infrared (IR)
- 30,000 hour LED life at 70% lumen maintenance
- 3M™ 300LSE waterproof adhesive tape
- 12 volt DC plug-in or hardwired power supply required (order separately)
- Aluminum housings available (order separately)

KELVIN TEMPERATURE OPTIONS

- 2700K (27) – Warm White
- 4000K (40) – Cool White
- 3000K (30) – Soft White
- 5000K (50) – Daylight White

Mount at front of toe kick

LED Tape Light – Side View Series

Tape lighting with LEDs toward side of tape
Medium light output – 126 lumens per foot (415/M) at 4000K

APPLICATIONS

- Drawer lighting
- Panel back lighting, column edge lighting, directional lighting
- Edge lighting panels, mirrors, beams

FEATURES

- Field cuttable approximately every 2 inches
- 18 diodes per foot (300 per roll)
- Non-waterproof LED tape light
- Dry location only
- 90 CRI (Color Rendering Index - true color)
- Dimmable (with compatible dimmer)
- No Ultraviolet (UV) or Infrared (IR)
- 30,000 hour LED life at 70% lumen maintenance
- 3M™ 300LSE waterproof adhesive tape
- 12 volt DC plug-in or hardwired power supply required (order separately)

Mount under face frame

Multi-Color RGB LED Tape Light

Tape Lighting with Protective Micro Waterproof Coating – IP65 rated
Multi-Color Light Output – 260 lumens per foot (854/M)

APPLICATIONS

- Interior cabinet
- Under cabinet
- Entertainment lighting
- Outdoor
- Bathroom
- Bar
- Backlight or edge lighting for signage

FEATURES

- Field cuttable approximately every 2 inches
- 18 diodes per foot (300 per roll)
- 16 ft. and 32 ft. rolls available in waterproof coated tape lighting
- IP65 rated protective micro waterproof coating
- Select from multiple color options
- Set to one color, multiple colors, and change colors any time
- Dimmable with Chroma Wireless Dimming System for on / off / dimming, color changing
- No Ultraviolet (UV) or Infrared (IR)
- 30,000 hour LED life at 70% lumen maintenance
- 3M™ 300LSE waterproof adhesive tape
- 12 volt DC plug-in or hardwired power supply required (order separately)

Features of our LED tape lighting kits

- ✔ 16 ft. of tape lighting, plug-in power supply, on / off / dimmer, connectors, wire, adhesive promoter wipe, and even a screwdriver
- ✔ Peel and stick the waterproof 3M™ 300LSE high-bond adhesive tape for secure installation (same tape used to attach emblems on cars)
- ✔ Cut tape lighting to the inch for exact length
- ✔ Add aluminum housings, if desired
- ✔ Easy wire management – cut the connecting wire to exact length, no jumpers to select or excess wire to hide, no wire nuts
- ✔ Wireless controller fits standard cover plates – no need to wire lighting to an electrical switch
- ✔ Need something special? We have kits for 1, 2, 3, or 4 zones, up to 65 ft. of lighting, plus Kelvin temperature options
- ✔ Professional-grade UL Listed tape lighting (UL mark on the tape light at every cut point), with Vivid Series high light output diode dense 225 lumens per foot.
- ✔ IP65 rated micro waterproof coating protects against water, dirt, cleaning, and damage.

How to select the best kit for the job

illumLED™ Tape Lighting kits take the guess work out of ordering lighting for a project. With a variety of kits available, we offer a kit to suit any lighting project need. Add up the total feet of tape light needed, determine the areas/zones required, and browse through our kit selection to find the best kit for the job.

Number of Zones needed?

In a lighting project, a Zone is a location requiring a separate dimming receiver to turn different lighting applications on / off / or dim at separate times.

An example of multiple zones in a project, is when it's desired that the lighting under the cabinet can be controlled separately from the lighting inside the glass door cabinets.

Number of Areas needed?

In a lighting project, an Area is a location requiring a separate power supply.

An example of requiring more than one area in a project, is when wire cannot be run across the entire space to be lit due to an obstruction, such as a doorway.

Example: everything needed to install 1-Zone, 1-Area of LED Tape Lighting

Example of 1-Zone installation for under cabinet lighting using Wireless Uno Controller

Example of 1-Zone installation for under cabinet lighting using Touch Dimmer Switch

EXPANSION PACKS FOR WIRELESS KITS

Expansion Packs

Description

Add a Zone

L-Q-EP1Z

Do you have enough tape light in the kit but need to add a Zone to an Area of your project? This expansion pack includes connectors and a 96 watt receiver to add a Zone using the remaining tape light in the kit.

- (1) T-Q-WR96 – Receiver (96 watts maximum 12V DC)
- (1) L-8MM-EZ6PK-W – White Tape Light to wire connectors (6 pieces total)

L-Q-EP1Z

Add an Area or a Zone

L-Q-EP1Z1A

Do you have enough tape light but need to add an Area or a Zone to your project? This expansion pack includes a power supply, connectors, and 96W receiver to add a Zone or an Area using the remaining tape light in the kit.

- (1) T-Q-WR96 – Receiver (96 watts maximum 12V DC)
- (1) L-8MM-EZ6PK-W – White Tape Light to wire connectors (6 pieces total)
- (1) T-60W-12V-PI – 60 watt 12V DC power supply

LED Puck Light – Pearl Series

Puck light with frosted and diamond lens
Medium light output – 180 lumens per puck light

APPLICATIONS

- Interior Cabinet
- Under Cabinet
- Display/Accent
- Over Sink
- Architectural Niche

FEATURES

- Recess or surface mount
- Includes 2 lenses: frosted and diamond
- 90 CRI (Color Rendering Index - true color)
- Dimmable (with compatible dimmer)
- Fully assembled fixture with frosted, and diamond lenses
- No Ultraviolet (UV) or Infrared (IR)
- 30,000 hour LED life at 70% lumen maintenance
- 12 volt DC plug-in or hardwired power supply required (order separately)
- 3 foot lead with end barrel connector
- 2-1/2" hole saw recommended for recess mount

KELVIN TEMPERATURE OPTIONS

- 2700K (27) – Warm White
- 4000K (40) – Cool White
- 3000K (30) – Soft White
- 5000K (50) – Daylight White

HOUSING FINISH OPTIONS

- Black (BK)
- Brushed Aluminum (BA)
- Bronze (BZ)
- White (WT)

Or recess mount

Mount in center of cabinet

LED Puck Light – Vivid Ultra Thin Series

Ultra thin puck light
Medium light output – 190 lumens per puck light

APPLICATIONS

- Interior Cabinet
- Under Cabinet
- Display/Accent
- Over Sink
- Niche

FEATURES

- Surface mount only
- 90 CRI (Color Rendering Index - true color)
- Fully assembled fixture with frosted, light-diffusing lens
- No Ultraviolet (UV) or Infrared (IR)
- 30,000 hour LED life at 70% lumen maintenance
- 12 volt DC plug-in or hardwired power supply required (order separately)
- 3 foot lead with end barrel connector

KELVIN TEMPERATURE OPTIONS

- 2700K (27) – Warm White
- 4000K (40) – Cool White
- 3000K (30) – Soft White
- 5000K (50) – Daylight White

sempriaLED® TASK lighting

See the difference

Task Lighting sempriaLED products create a smooth, even glow on the countertop surface and eliminates the unsightly dot-dot-dot effect other LED lights create.

Excellent quality. Same price.

This upgrade of quality to the sempriaLED product line comes at no extra charge.

Experience the quality of "No Dot"

Task Lighting is the first company to offer "No Dot" feature as a standard across the entire line of sempriaLED products. This means the home can have clean soft reflections, and consistent quality LED Lighting across all of its spaces.

Try the upgraded "No Dot" sempriaLED product line risk free with our Trial Order program and eliminate the unsightly dots on countertops.

Learn More!

Place a Trial Order for any new-to-you Task Lighting products and try them out. If you're not satisfied, we'll take them back. Guaranteed! See page 147 for more details.

Strip Light Fixture – SG9 Series

Linear under cabinet LED fixture and available WireWay system for concealed wire management
Higher light output – 600 lumens per foot at 3000K

APPLICATIONS

- Under cabinet
- Cove
- Display case

FEATURES

- Low profile – 1/2"
- Higher light output at 600 lumens per foot at 3000K
- 6 watts per foot
- 90 CRI (Color Rendering Index - true color)
- Dimmable (with compatible dimmer)
- Fully assembled fixture with frosted, light-diffusing lens
- No Ultraviolet (UV) or Infrared (IR)
- 50,000 hour LED life at 70% lumen maintenance
- 12 volt DC plug-in or hardwired power supply required (order separately)

KELVIN TEMPERATURE OPTIONS

- 2700K (27) – Warm White
- 3000K (30) – Soft White
- 4000K (40) – Cool White
- 5000K (50) – Daylight White

LED SPECIFICATIONS

LED Beam Angle 120°

LED Board

6" or 12" **NOTE:** LED boards are placed in the center of each fixture.

OPTIONAL INSTALLATION COMPONENTS

SG9-WW-48-Color

48" field-cutable WireWay. Available in Black (BK), Grey (GRY), or White (WT)

SG9-WW-MJ12Color

(2) 12" WireWay pieces with 45° miter joint. Available in Black (BK), Grey (GRY), or White (WT)

Mini Angled Strip Light Fixture – A Series

Mini angled fixture with a slim profile for multiple applications
High light output – 400 lumens per foot at 3000K
Medium light output – 200 lumens per foot at 3000K

APPLICATIONS

- Interior cabinet
- Toe kick/soffit
- Cove
- Stairs
- Display case

FEATURES

- Mini angled design perfect for inside cabinets, directing the light inward
- Slim profile – 5/8"
- High light output at 400 lumens per foot at 3000K, or Medium – 200
- 4 watts per foot, 2 watts per foot
- 90 CRI (Color Rendering Index - true color)
- Dimmable (with compatible dimmer)
- Fully assembled fixture with frosted, light-diffusing lens
- No Ultraviolet (UV) or Infrared (IR)
- 50,000 hour LED life at 70% lumen maintenance
- 12 volt DC plug-in or hardwired power supply required (order separately)

Recessed Strip Light Fixture – R Series

Linear **recessed** LED fixture
Higher light output – 600 lumens per foot at 3000K
High light output – 400 lumens per foot at 3000K
Medium light output – 200 lumens per foot at 3000K

APPLICATIONS

- Under cabinet
- Frameless cabinets
- Floating and fixed shelves
- Closet
- Toe Kick

FEATURES

- Designed for recessed flush mounting
- 5/8" router recommended for install
- Higher light output at 600 lumens per foot at 3000K, or High – 400, Medium – 200
- 6 watts per foot, 4 watts per foot, 2 watts per foot
- 90 CRI (Color Rendering Index - true color)
- Dimmable (with compatible dimmer)
- Fully assembled fixture with frosted, light-diffusing lens
- No Ultraviolet (UV) or Infrared (IR)
- 50,000 hour LED life at 70% lumen maintenance
- 12 volt DC plug-in or hardwired power supply required (order separately)

KELVIN TEMPERATURE OPTIONS

Lighted Closet Rod Fixture

High Light Output – 400 lumens per foot at 3000K

APPLICATIONS

- Closet
- Laundry Room
- Stair Railing

FEATURES

- Flange set included with each Lighted Closet Rod
- Each end is field trimmable up to 3"
- High light output at 400 lumens per foot at 3000K
- 4 watts per foot
- 90 CRI (Color Rendering Index - true color)
- Fully assembled round-shaped rod fixture with frosted, light-diffusing lens
- No Ultraviolet (UV) or Infrared (IR)
- 50,000 hour LED life at 70% lumen maintenance
- 12 volt DC plug-in or hardwired power supply required (order separately)
- Accessories sold separately: WireWay and Center Bracket Support

KELVIN TEMPERATURE OPTIONS

- 2700K (27) – Warm White
- 3000K (30) – Soft White
- 4000K (40) – Cool White
- 5000K (50) – Daylight White

LED SPECIFICATIONS

LED Beam Angle 120°

LED Board

6" or 12" **NOTE:** LED boards are placed in the center of each fixture.

OPTIONAL INSTALLATION COMPONENTS

LC9R-CBS-Finish

Center Bracket Support (Use every 48")
Available in Black (BK), Bronze (BZ),
Satin Nickel (SN) or White (WT)

SG9-WW-48Color

48" field-cutttable WireWay. Available in
Black (BK), Grey (GRY), or White (WT)

BARREL CONNECTORS - use with illumaLED tape light, puck lights, power supplies

Part Number	Description	Dimensions
T-MBC	Male barrel to conductor screw-down connector. Use to add a female barrel connector to a pair of lead wires for connection to an LED light power supply or cable.	1-9/16" x 37/64" x 1/2" 40mm x 14.5mm x 12.8mm
T-FBC	Female barrel to conductor screw-down connector. Use in conjunction with male barrel connector to pair lead wires or to connect and rewire an LED light power supply cable.	1-9/16" x 37/64" x 1/2" 39mm x 13.8mm x 12mm

T-MBC

T-FBC

EZ CONNECTORS - use with illumaLED tape light

Part Number	Description	Dimensions
L-8MM-EZ100PK	8 mm EZ connector – 100 pack. Use to connect 8mm tape light to wire.	29/64" x 13/32" x 5/16" 11.45mm x 10.15mm x 7.9mm
L-8MM-EZ6PK	8 mm EZ connector – 6 pack. Use to connect 8mm tape light to wire.	29/64" x 13/32" x 5/16" 11.45mm x 10.15mm x 7.9mm
L-8MM-EZ100PK-W	White 8 mm EZ connector – 100 pack. Use to connect 8mm tape light to wire.	29/64" x 13/32" x 5/16" 11.45mm x 10.15mm x 7.9mm
L-8MM-EZ6PK-W	White 8 mm EZ connector – 6 pack. Use to connect 8mm tape light to wire.	29/64" x 13/32" x 5/16" 11.45mm x 10.15mm x 7.9mm

L-8MM-EZ-6PK

L-8MM-EZ-6PK-W

EZ PUSH CONNECTORS - use with stranded or solid wire

Part Number	Description	Dimensions
T-EZWC	EZ wire-to-wire connector. Must strip wire to insert into connector. Use to daisy chain fixtures in parallel runs or to connect around corners.	51/64" x 11/16" x 5/16" 20.1mm x 17.6mm x 13.7mm

FLEX SHEET PIN CONNECTOR - use with FLEX sheet light

Part Number	Description	Dimensions
L-FSL-C	Pin connector for simple connection from sheet light to sheet light.	51/64" x 11/16" x 5/16" 20.1mm x 17.6mm x 13.7mm

8MM CONNECTORS - use with illumaLED 8mm tape light

Part Number	Description	Dimensions
L-8MM-SC	8 mm splice snap connector. Use to connect 8 mm LED tape light with no lead wire between the connection.	49/64" x 1/2" x 5/16" 19.5mm x 12.8mm x 7.75mm
L-8MM-WTSC	8 mm LED tape light to wire connector. Use to connect 8mm tape light to wire without stripping any wires.	61/64" x 1/2" x 5/16" 24.4mm x 12.7mm x 7.85mm

L-8MM-SC

L-8MM-WTSC

10MM CONNECTORS - use with illumaLED 10mm tape light

Part Number	Description	Dimensions
L-10MM-SC	10 mm splice snap connector. Use to connect 10 mm LED tape light with no lead wire between the connection.	15/16" x 37/64" x 5/16" 19.6mm x 14.7mm x 7.8mm
L-10MM-WSC	10 mm LED tape light to wire connector. Use to connect 10mm tape light to wire without stripping any wires.	61/64" x 37/64" x 19/64" 24.4mm x 14.7mm x 7.65mm

L-10MM-SC

L-10MM-WSC

FLEXIBLE CONNECTORS - use with illumaLED 8mm tape light

Part Number	Description	Dimensions
L-8MM-FLEX3PK	3 pack of flexible 8 mm corner connectors – Black. 4" wire in between connectors. Use to turn corners at any angle with 8 mm tape lighting. Compatible with single color tape light and tunable white tape light.	4-29/32" x 13/32" x 5/16" 124.62mm x 10.15mm x 7.9mm
L-8MM-FLEX3PK-W	3 pack of flexible 8 mm corner connectors – White. 4" wire in between connectors. Use to turn corners at any angle with 8 mm tape lighting. Compatible with single color tape light and tunable white tape light.	4-29/32" x 13/32" x 5/16" 124.62mm x 10.15mm x 7.9mm

L-8MM-FLEX3PK

L-8MM-FLEX3PK-W

3-WAY SPLITTER - use with illumaLED™ and sempriaLED™ lighting

Part Number	Description	Dimensions
T-3WSP	DC 3-way splitter plug. Use to connect multiple LED light fixtures to a dimming system.	16" overall length 8" length of one splice

INLINE PIN CONNECTOR - use with sempriaLED fixtures

Part Number	Description	Dimensions
STS-ICONN	Inline pin connector for direct connection of adjacent fixtures – use with sempriaLED A, F, R, S, and SG9 Series lighting fixtures. Sold in pairs.	1/2" x 1/32" 12.4mm x .8mm

PLUG-IN POWER SUPPLIES – use with sempriaLED® and illumaLED™ Lighting

Part Number	Description	Dimensions
T-12W-12V-PI	12 watt AC/DC 2 prong plug-in, 12 volt DC 1 AMP. Compatible with tape lighting and lighting fixtures, the wireless dimming system, switches, and sensors.	2-15/16" x 1-3/16" x 1-13/16"
T-24W-12V-PI	24 watt AC/DC 2 prong plug-in, 12 volt DC 2 AMP. Compatible with tape lighting and lighting fixtures, the wireless dimming system, switches, and sensors.	3-11/16" x 1-7/8" x 1-5/16"
T-36W-12V-PI	36 watt AC/DC 2 prong plug-in, 12 volt DC 3 AMP. Compatible with tape lighting and lighting fixtures, the wireless dimming system, switches, and sensors.	3-3/4" x 2" x 1-5/16"
T-60W-12V-PI	60 watt AC/DC 2 prong plug-in, 12 volt DC 5 AMP. Compatible with tape lighting and lighting fixtures, the wireless dimming system, switches, and sensors.	5-1/8" x 2-1/16" x 1-1/4"
T-96W-12V-PI	96 watt AC/DC 3 prong plug-in, 12 volt DC 8 AMP. Compatible with tape lighting and lighting fixtures, the wireless dimming system, switches, and sensors.	5-1/2" x 2-3/8" x 1-3/8"
T-120W-12V-PI	120 watt AC/DC 3 prong plug-in, 12 volt DC 10 AMP. Compatible with tape lighting and lighting fixtures, the wireless dimming system, switches, and sensors.	6-3/8" x 2-11/16" x 1-1/4"

NOTE: Power supplies over 60 watts are UL Listed for commercial use, and are not UL Class 2 Listed for residential use.

Wiring for Plug-in Power Supplies

WATERPROOF POWER SUPPLIES – use with sempriaLED® and illumaLED™ Lighting

Part Number	Description	Dimensions
T-60W-12-WP-HW	60 watt, 12 volt IP67 rated waterproof LED hardwired. Compatible with tape lighting and lighting fixtures, the wireless dimming system, switches, and sensors.	6-1/2" x 1-5/8" x 1-1/4"
T-150W-12-WP-HW	150 watt, 12 volt IP67 rated waterproof LED hardwired. Compatible with tape lighting and lighting fixtures, the wireless dimming system, switches, and sensors.	7-3/8" x 2-3/8" x 1-1/2"

NOTE: Power supplies over 60 watts are UL Listed for commercial use, and are not UL Class 2 Listed for residential use.

Wiring for Waterproof Power Supplies

INDUSTRIAL POWER SUPPLY – use with sempriaLED® and illumaLED™ Lighting

Part Number	Description	Dimensions
T-320W-12V-HW	320 watt 12 volt indoor industrial hardwired. Compatible with tape lighting and lighting fixtures, the wireless dimming system, switches, and sensors. Can be hardwired or installed with a 3-prong power cord plugged into an outlet.	8-1/2" x 4-1/2" x 2"

NOTE: Power supplies over 60 watts are UL Listed for commercial use, and are not UL Class 2 Listed for residential use.

Wiring for Industrial Power Supplies

HARDWIRED POWER SUPPLIES – use with sempriaLED® and illumaLED™ Lighting

Part Number	Description	Dimensions
T-DT24W-12V-HW	24 watt 12 volt DC dimmable class 2 LED hardwired. Compatible with the 120 volt magnetic dimmer switch and wall sensors.	13-3/4" x 3" x 1-5/8"
T-DT48W-12V-HW	48 watt 12 volt DC dimmable class 2 LED hardwired. Compatible with the 120 volt magnetic dimmer switch and wall sensors.	13-3/4" x 3" x 1-5/8"
T-DT60W-12V-HW	60 watt 12 volt DC dimmable class 2 LED hardwired. Compatible with the 120 volt magnetic dimmer switch and wall sensors.	13-3/4" x 3" x 1-5/8"
T-DT120W-12V-HW	120 watt 12 volt DC dimmable LED hardwired. Compatible with the 120 volt magnetic dimmer switch and wall sensors.	15" x 3-1/8" x 2-1/2"

NOTE: Power supplies over 60 watts are UL Listed for commercial use, and are not UL Class 2 Listed for residential use.

24 VOLT POWER SUPPLY – use with illumaLED™ 24 volt lighting

Part Number	Description	Dimensions
T-DQ75W-24V-HW	75 watt 24 volt DC RF CV Hardwired Power Supply with built-in Wireless Receiver. Purchase wireless controller separately. Use for LED FLEX Sheet Light or illumaLED Sign Light. Can be hardwired or installed with a 3-prong power cord plugged into an outlet.	19-1/2" x 1-1/4" x 7/8"

Wiring for 24 Volt Power Supply

WIRELESS DIMMING SYSTEM – use with Plug-in or Waterproof Power Supplies

Part Number	Description	Dimensions
T-TWAV-WR-120 	WAV 120 watt smart LED receiver. Allows you to use a wireless controller, an app, or voice to control lights. Use with TandemLED smart controller (T-T-1Z-WC-RF-Color) for tunable white light control.	4-1/4" x 2-1/4" x 3/8"
T-Q-WR96	96 watt LED receiver. Use one LED receiver per Zone and pair with an Uno 1-Zone Controller (T-Q-1Z-WC-RF-Color), Duo 2-Zone Controller (T-Q-2Z-WC-RF -Color), or Quattro 4-Zone Controller (T-Q-4Z-WC-RF -Color) to control on / off / dimming in each lighting Zone.	3-3/8" x 1-1/2" x 13/16"
T-Q-WR240	240 watt LED receiver. Use one LED Receiver per Zone and pair with an Uno 1-Zone Controller (T-Q-1Z-WC-RF-Color), Duo 2-Zone Controller (T-Q-2Z-WC-RF -Color), or Quattro 4-Zone Controller (T-Q-4Z-WC-RF -Color) to control on / off / dimming in each lighting Zone.	6-7/16" x 1-7/8" x 15/16"
T-T-1Z-WC-RF-Color Compatible	TandemLED smart controller. Control 1 zone of lights, tune the color temperature of the lights, dim lights and turn off / on. Use with T-TWAV-WR-120 receiver. Available in Almond (AL), Black (BK), Brown (BR), Grey (GR), or White (WT)	2-5/8" x 1-5/16" x 3/8"
T-Q-1Z-WC-RF-Color Compatible	UNO 1-Zone LED controller. Allows you to control 1-Zone of lights with on / off / and dimming options. Use with T-Q-WR96 receiver or T-Q-WR240 receiver. Use with WAV 120 watt smart LED receiver to use a wireless controller, an app, or voice to control lights. Available in Almond (AL), Black (BK), Brown (BR), Grey (GR), or White (WT)	2-5/8" x 1-5/16" x 3/8"
T-Q-2Z-WC-RF-Color Compatible	DUO 2-Zone LED controller. Allows you to control 2-Zones of lights with on / off / and dimming options. Use with T-Q-WR96 receiver or T-Q-WR240 receiver. Use with WAV 120 watt smart LED receiver to use a wireless controller, an app, or voice to control lights. Available in Almond (AL), Black (BK), Brown (BR), Grey (GR), or White (WT)	2-5/8" x 1-5/16" x 3/8"
T-Q-4Z-WC-RF-Color Compatible	Quattro 4-Zone LED controller. Allows you to control up to 4-Zones of lights with on / off / and dimming options. Use with T-Q-WR96 receiver or T-Q-WR240 receiver. Use with WAV 120 watt smart LED receiver to use a wireless controller, an app, or voice to control lights. Available in Almond (AL), Black (BK), Brown (BR), Grey (GR), or White (WT)	2-5/8" x 1-5/16" x 3/8"

Connecting Wireless Receiver to Tape Light or Puck Light

SENSORS AND SWITCHES – use with Plug-in or Waterproof Power Supplies

Part Number	Description	Dimensions
T-DSS-30W-IR	Infrared (IR) door sensor switch. The surface mount IR door sensor switch, with a 1-1/2" detection area, allows lights to remain on until the door or drawer is closed.	3/8" x 1" x 1-1/4"
T-2HDSS-30W-IR	Infrared (IR) door sensor switch with two heads for use in two-door cabinet. The surface mount IR door sensor switch, with a 1-1/2" detection area, allows lights to remain on until the door or drawer is closed.	3/8" x 1" x 1-1/4"
T-MSS-60W	Motion sensor switch. Mount sensor switch as close as possible to where movement will occur – facing out. The motion sensor activates the lighting and shuts it off 30 seconds after no motion is detected from any direction within 10 ft.	1/2" x 2-1/4"
T-PSS-60W-IR	Infrared (IR) sensor proximity switch. Place as close to the light source as possible while ensuring it is not exposed to light when the sensor is intended to be inactive.	2-1/4" x 3/8"
T-TDS-60W	LED touch dimmer. Touch to switch lights on / off and hold to dim.	3/8" x 2" x 2"
T-WSS-60W-IR	Infrared (IR) wave sensor switch. Install near the light source and activate by waving hand in front of IR sensor to turn on / off.	2-1/4" x 3/8"

AMPLIFIER – use with illumaLED single color and RGB multi-color tape lighting

Part Number	Description	Dimensions
T-AMP-180W	Use when powering more than 32 ft. of illumaLED single color tape lighting or RGB multi-color tape lighting. NOTE: Not compatible with TandemLED™ products.	7" x 1-13/16" x 7/8"

T-AMP-180W

WIREWAY AND PROFILES – use for sempriaLED and illumaLED

Part Number	Description	Dimensions
SG9-WW-MJ12-Color	(2) 12" WireWay pieces with 45° miter joint for Strip Light Fixture – SG9 Series. Available in Black (BK), Grey (GRY), or White (WT)	48" x 1-1/4" x 1/2"
SF9-WW-48	48" Mini Strip Light Profile (aluminum housing and lens). Use as WireWay for F Series or as a profile for tape lighting.	48" x 1/2" x 1/2"
SA9-WW-48	48" Mini Angled Strip Light Profile (aluminum housing and lens). Use as WireWay for A Series or as a profile for tape lighting.	48" x 1/2" x 5/8"
SS9-WW-48	48" Angled Strip Light Profile (aluminum housing and lens). Use as WireWay for S Series or as a profile for tape lighting	48" x 3/4" x 11/16"
SR9-WW-48	48" Recessed Strip Light Profile (aluminum housing and lens). Use as WireWay for R Series or as a profile for tape lighting	48" x 5/8" x 1/2"

PROFILES – use for illumaLED only

Part Number	Description	Dimensions
L-002-Lens-48	002 recessed aluminum housing 48" – Frosted (FR) or Clear (CL) lens. Compatible with illumaLED 8 mm and 10 mm tape lighting for sturdy, dust-proof enclosure. This product is field-cuttable. Use with L-EC-002 for end caps.	48" x 1" x 5/16"
L-003-Lens-48	003 angled aluminum housing 48" – Frosted (FR) or Clear (CL) lens. Compatible with illumaLED 8 mm and 10 mm tape lighting for sturdy, dust-proof enclosure. This product is field-cuttable. Use with L-EC-003 for end caps.	48" x 5/8" x 5/8"
L-003-Lens-80	003 angled aluminum housing 80" – Frosted (FR) or Clear (CL) lens. Compatible with illumaLED 8 mm and 10 mm tape lighting for sturdy, dust-proof enclosure. This product is field-cuttable. Use with L-EC-003 for end caps.	80" x 5/8" x 5/8"
L-007-Lens-48	007 flat aluminum housing 48" – Frosted (FR) or Clear (CL) lens. Compatible with illumaLED 8 mm and 10 mm tape lighting for sturdy, dust-proof enclosure. This product is field-cuttable. Use with L-8MM-EZ6PK for end caps.	48" x 5/8" x 3/8"

LED Sheet Light – FLEX-LED Series

Flat panel LED sheet light
Higher Light Output – 1240 lumens per fixture at 4000K

APPLICATIONS

- Backlight for sign application
- Illuminate opaque countertops
- Architectural lighting
- Wherever flexible lighting is needed

FEATURES

- 384 diodes per sheet
- Higher light output at 1240 lumens per fixture
- This product can be cut every 1-1/2" on the 24" side and at 4-1/2" on the 9" side
- 90 CRI (Color Rendering Index - true color)
- Heat dissipation is designed to leave the sheet cool through extended use.
- Dimmable (with compatible dimmer)
- No Ultraviolet (UV) or Infrared (IR)
- 30,000 hour LED life at 70% lumen maintenance
- 24 volt DC plug-in or hardwired power supply required (order separately)
- Quickly mount using spray adhesive, double-sided tape, or screws.

KELVIN TEMPERATURE OPTIONS

- 3400K (34)
- 4000K (40) – Cool White
- 6000K (60)

LED SPECIFICATIONS

LED Beam Angle 120°

ANGLE POWER STRIP

LED Sign Light

24 volt LED Sign Light for commercial use.
Higher Light Output – 1500 lumens per fixture at 4000K

APPLICATIONS

- Side backlight for advertisement box
- Side backlight for sign
- Use for lighting walls and fabric

FEATURES

- 7 large diodes per board
- Higher light output at 1500 lumens per fixture at 4000K
- Fully assembled fixture with frosted, light-diffusing lens
- No Ultraviolet (UV) or Infrared (IR)
- 50,000 hour LED life at 70% lumen maintenance
- 24 volt DC hardwired power supply required (order separately)
- Connectors on each end for quick connection between each unit

= Recommended

Most LED Lighting products work well in multiple applications. The yellow "Recommended" check mark indicates those products selected most often for that application.

= Another Option

Products with the black "Another Option" check mark are also commonly used in that application.

Use this Selection Guide for help choosing LED Lighting

In choosing the best LED Lighting for your application, there are several factors to consider:

1. What is the primary intended use of the lighting?
 - Is it for task lighting to illuminate a work area?
 - Is it for accent lighting to illuminate a specific spot or object?
 - Is it for general lighting or general ambient lighting?
 - Is it to increase safety?
2. What space is available for mounting the lighting?
3. Is it your intention to hide the light so that it's not visible?
4. What is the impact of the color and reflectivity of surrounding surfaces (backsplash, cabinets, countertop, paint) in choosing Kelvin temperature of the fixture?
5. What is the availability of electricity, and are there any obstructions in running power to the lighting?
6. Do you plan to switch lights on/off only, or do you prefer dimming options?
7. Where do you want to locate a switch or dimmer, and do you want one or multiple controls?
8. Are you interested in a combined light and receptacle fixture?
 - Mounted under cabinet against the backsplash, the Lighted Power Strip provides task lighting for the countertop, with built-in outlets for appliances, switches for garbage disposal and lights. Your backsplash remains clean and uninterrupted by outlets and switches.
9. What is the set budget for LED lighting?

Need help with product selection advice on any of the above?

Contact our Design Services and Technical Support team at 866-848-9094 or e-mail DesignAndSupport@TaskLighting.com

Selecting Lighting

Face frame under cabinet

Light mounts at front of cabinet

When lighting your kitchen, use under cabinet lighting to complement your overhead lighting. This is especially great for providing focused illumination on your kitchen work area and highlighting your backsplash.

Under cabinet lighting helps eliminate body shadows in the work area.

Strip Light Fixture

Selecting Lighting

Frameless under cabinet

Light mounts at front of cabinet

When lighting your kitchen, use under cabinet lighting to complement your overhead lighting and eliminate body shadows on the work surface. The lighting provides focused illumination for the countertop and highlights your backsplash.

For frameless cabinetry, use a light rail moulding to hide the strip light fixture or use recessed puck lights, recessed strip light fixtures, or recessed tape light housing for flush mount installations.

Selecting Lighting

Face frame interior cabinet –glass shelves

Mount in middle or front of cabinet

Puck lights provide a dramatic focus of lighting through the interior of a cabinet and can be surface mounted or recessed into the ceiling of the cabinet.

Install strip light fixtures or tape lighting horizontally at the top of the cabinet for a wash of light or vertically behind the face frame for more even lighting throughout.

Selecting Lighting

Frameless interior

Mount vertically between hinges

Mount tape lighting vertically along the cabinet wall, avoiding hinges and shelf pin holes. Alternatively, install strip light fixtures or tape lighting horizontally at the top of the cabinet and under any wood shelves.

For glass shelves, recess or surface mount puck lights at the top of the cabinet.

Light mounts at front of flyover

Use a light fixture over your sink to illuminate the work area and reduce eye strain.

Puck lights are unobtrusive.

Strip light fixtures can be surface-mounted, or recessed and completely hidden.

If there is already 120V power above the sink, such as when replacing a fluorescent light, the 120V bar light is a direct replacement.

Tape lighting is also unobtrusive.

Strip Light Fixture

Light mounts directly beneath stair railing

Install Tape Light directly beneath a stair railing, or route a channel into the bottom of the rail and recess a strip light fixture for an inviting alternative to ceiling lighting.

Add sensor switches for a safety nightlight and hands-free convenience.

Selecting Lighting

Island bar peninsula

Light mounts beneath overhang

Lighting mounted underneath an island countertop or peninsula countertop brings out the inviting color and texture of the base cabinet finish and draws attention to corbels or other architectural supports.

Install beneath the overhang on a raised island countertop to provide light for the work surface.

Angled Strip Light Fixture

sempriaLED S Series page 98

- Medium light output
- Mount in middle of counter to throw light to back wall

sempriaLED™ Price-by-the-Foot

Under cabinet lighting

Use the sempriaLED Price-by-the-Foot program to quickly specify, quote, and sell sempriaLED SG9 or sempriaLED F Series under cabinet lighting, priced by the foot.

You calculate the number of feet of sempriaLED lighting needed for the project, and we provide three Price by the Foot quotes – Good-Better-Best – for the lighting and all accessories like power supplies and wire. Quickly calculate three price quotes in three price ranges!

1. Contact your Hardware Resources salesperson to obtain your **Price-by-the-Foot** level for our Good Package, Better Package, and Best Package
2. Measure (in inches) the full width of each cabinet to be illuminated, including any fillers
3. Divide the total number of inches by 12, carried to two decimal points (ex. 123" = 10.25 feet)
4. Multiply this number of feet by the **Price-by-the-Foot** level for each package. These three quotes are your net cost for all parts and pieces to beautifully light your under cabinet project!

STEP 1

Choose an option for your budget

Best Package

- Higher light output – 6 watts per foot
- Uses maximum fixture size for space available
- Comes with mounting brackets, power supply, 10 feet of wire, and WireWay for concealing all wiring
- Premium price point

Products used in Best Package

- 6" SG9-6ND3-[MountColor-FTemp](#)
- 12" SG9-12ND6-[MountColor-FTemp](#)
- 18" SG9-18ND6-[MountColor-FTemp](#)
- 24" SG9-24ND12-[MountColor-FTemp](#)
- 30" SG9-30ND15-[MountColor-FTemp](#)
- 36" SG9-36ND18-[MountColor-FTemp](#)
- 42" SG9-42ND21-[MountColor-FTemp](#)
- 48" SG9-48ND24-[MountColor-FTemp](#)

Section View

SG9-18ND6-BK-F30

Mount at front of cabinet

Better Package

- High light output – 4 watts per foot
- Uses maximum fixture sizes for space available
- Comes with 10 feet of wire and power supply
- Medium price point

Products used in Better Package

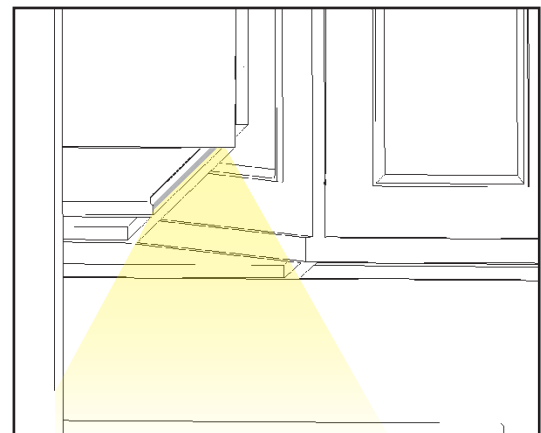

- 6" SF9Q-6ND2-[FTemp](#)
- 12" SF9Q-12ND4-[FTemp](#)
- 18" SF9Q-18ND6-[FTemp](#)
- 24" SF9Q-24ND8-[FTemp](#)
- 30" SF9Q-30ND10-[FTemp](#)
- 36" SF9Q-36ND12-[FTemp](#)
- 42" SF9Q-42ND14-[FTemp](#)
- 48" SF9Q-48ND16-[FTemp](#)

Section View

SF9Q-12ND4-F30

Mount at front of cabinet

Good Package

- High light output – 4 watts per foot
- Uses shorter fixtures compared to Best and Better options
- Lowest price point

Products used in Good Package

- 6" SF9Q-6ND2-FTemp
- 12" SF9Q-12ND4-FTemp
- 18" SF9Q-18ND6-FTemp
- 24" SF9Q-24ND8-FTemp
- 30" SF9Q-30ND10-FTemp
- 36" SF9Q-36ND12-FTemp
- 42" SF9Q-42ND14-FTemp
- 48" SF9Q-48ND16-FTemp

Section View

SF9Q-12ND4-F30

Mount at front of cabinet

STEP 2

Measure your cabinet

- Measure in inches the full size of each cabinet in the lighting zone, including any fillers (do not include cabinets with no lighting planned)
- Divide total number of inches by 12 (one foot), carried to two decimal points (123 in. = 10.25 feet)
- Choose your package (Good, Better, Best) based on budget and design
- Multiply number by the Good, Better, Best level you have selected for your net cost
- Add your product cost, labor cost, mark-up, and present to your customer
- When ready to order, send floor plan and elevations to DesignAndSupport@TaskLighting.com, along with your purchase order
- Included in your product shipment, you will receive your plan showing the location of each fixture

Floor plan example

- 3 – 18" – Mini Strip Light Fixture – F Series (Good)
- 1 – 30" – Mini Strip Light Fixture – F Series (Good)

Accent Lighting

Lighting that draws attention to objects, architectural features, and surface textures. Examples include sculptures and art pieces, textured backsplash and other wall surfaces, cove moulding, ceiling detail designs, and cabinet interiors.

Ambient Lighting

Commonly called general lighting, it is the primary source of illumination in a space. It can be provided by both natural and artificial sources.

Amp (Ampere)

Unit of measurement indicating the intensity of the current flow through an electrical circuit. Wiring and circuit breaker protection are calculated based on the amps drawn by the lighting circuits.

Application

The intended use of a lighting product. Under cabinet, cove, and interior are all examples of lighting applications.

Area (for LED lighting)

A section of lighting that is separated from another section by an obstruction such as a door, wall or window. Each AREA requires a separate power supply.

Backlighting

Lighting designed to illuminate an object from behind, which causes an appealing glow effect around its edges. Backlighting is a type of accent lighting, and is commonly used to draw attention to works of art.

Beam Angle

Also known as beam spread, the beam angle is a value that describes the downward light cone emitted by a lighting fixture. The beam angle is measured on the illuminated surface, at the center of the point where the lamp provides maximum lighting intensity, and the point where the intensity drops to 50%. A lamp with a high beam angle spreads light into a wider cone.

Binning

A process by which LEDs are sorted at the time of manufacture in order to ensure accurate color consistency between individual LEDs.

Controller

A wireless control used in combination with an RF receiver to switch and dim our low voltage LED lighting, or to switch, dim and change colors for RGB Tape Lighting.

Circuit Breaker

Electrical protection device that is normally located within a circuit breaker panel. Each lighting circuit is connected to a circuit breaker, and it interrupts current automatically if an overload or fault is detected.

Color Rendering Index (CRI)

A metric used to describe how accurately a light source renders the true colors of objects and spaces. The sun has a perfect index of 100. Using lighting with a high CRI value is very important in high-end interior design, as they enhance the visibility of décor and fine details.

Cool White

A light source with a Kelvin temperature of around 4000K. Light sources at this color temperature value do not have the characteristic yellow hue of incandescent bulbs or warm white LED lighting.

Correlated Color Temperature (CCT)

Unlike the CRI, which describes how faithfully a light source represents other objects, the Correlated Color Temperature (CCT) describes the color output of the light itself. Some common CCT values include:

- 2700K, with a warm tinge of yellow that creates appealing and relaxing environments
- 4000K, a neutral white tone that strikes just the right balance between relaxation and concentration
- 6500K, with a slight tinge of blue, which has an energizing effect

It is important to note that the CCT is not the real operating temperature of a lamp.

Cove Lighting

A type of lighting that is installed behind wall or ceiling cove moulding and directs the light towards the ceiling. The lighting is often used for decorative purposes because it can emphasize the borders of walls, as well as ceiling features.

CRI

See Color Rendering Index

Daylight White

A color temperature value comparable to that of daylight, generally between 5000K and 6500K. It is important to note that the term does not refer to actual daylight, but rather artificial lighting that replicates the color of daylight and has a tinge of blue color.

DC

Acronym for Direct Current. Used to describe a power supply where the flow of electricity always takes place in the same direction.

Diffused Light

Light produced by an extended surface such as a lens, either directly or through reflection. Diffused light provides a uniform and soft light distribution that minimizes shadows.

Dimmer

A device that regulates the lighting output of lighting by controlling the power supplied. Dimmers can be used to make indoor environments more customizable and personal and are also useful to save energy. It is important to note that not all power supplies are compatible with all dimmers, and incompatible dimmers may damage the light fixture or power supply.

Direct Lighting

Lighting where more than 90% of the light goes directly from the source to the area you wish to illuminate.

Driver

See Power Supply

Efficacy

Describes how effectively a lighting fixture can convert electric power into lighting, measured in lumens per watt.

Foot-candle (fc)

A measurement unit for illuminance. One foot-candle is equivalent to one lumen per square foot.

Hard wire

Wiring that is semi-permanent and connected directly to electrical power. An example is a power supply that does not have a plug, but wires directly to the power source.

Heat Sink

A device or substance used for absorbing and dissipating excessive or unwanted heat.

Housing

The fixture body that surrounds and holds the light source or receptacles.

IP65

The IP Code is an international standard that rates the levels of sealing effectiveness against environmental conditions such as dust, water, tools, etc. Our Tape Lighting is rated IP65 for dust and jets of water.

Kelvin Temperature, Kelvin Scale, K.

Used in lighting to measure the color temperature of lighting. The lower the light temperature rates on the Kelvin scale, the "warmer" the light appears. The higher the temperature rating on the Kelvin scale, the "cooler" and bluer the light appears.

- 2700K, is a warm tone with a tinge of yellow that creates appealing and relaxing environments
 - 4000K, is a neutral white tone that strikes just the right balance between relaxation and concentration
 - 6500K, has a slight tinge of blue, which has an energizing effect
-

Layered Light

An interior design approach where several types of lighting are combined to achieve a specific ambiance or mood.

Lamp

Commonly called a light bulb.

LED life (Lamp life)

The number of operating hours until the LEDs have a reduced light output below 70%.

LED

Short for Light Emitting Diode, a solid-state component that emits light when exposed to electric current. LED lighting represents the state-of-the-art in the industry, outclassing most other types of lighting in terms of energy efficiency, design flexibility and colors of light available.

Light Source

Commonly called a lamp or light bulb.

Lighting Load

The energy used to power the LED fixtures. It is determined by the number of watts used by the fixture.

Low Voltage Fixtures / Low Voltage Lamps

Lights that operate at a lower voltage than the standard household voltage. The LED fixtures use a step-down transformer or power supply to reduce the voltage from 120 volts to 12 volts or 24 volts.

Lumen

A standardized unit of measurement of light level intensity, or the brightness of a light source.

Lumens per Watt

The ratio of the light output per watt of energy consumption, indicating the efficacy of a light source.

Luminaire

A complete lighting unit consisting of the lamps or LEDs with the parts designed to distribute the light, parts that position and protect the lamps, and parts that connect the lamps to the power supply.

Lux

A standardized unit of measurement of light level intensity, which is commonly referred to as illumination. A measurement of 1 lux is equal to the illumination of a one-meter square surface that is one meter away from a single candle.

National Electric Code

A publication by the National Fire Protection Association, which establishes the requirements for fireproof electrical installations. It is a part of the National Fire Codes NFPA (National Fire Protection Association) outlining the United States standard for the safe installation of electrical equipment and wiring.

NEMA Enclosure Type

A numeric code that describes the degree of protection offered by an enclosure, according to the NEMA 250-214 standard. For example:

- NEMA 2 = Indoor use, protection against falling dirt and light splashing of water.
 - NEMA 3R = Indoor or outdoor use, dirt protection, resistant to rain and snow.
 - NEMA 4X = Indoor or outdoor use, dust-tight, water-proof (including hose-down) and corrosion-proof.
-

NEC

See National Electrical Code

Occupancy Sensor

A device that uses infrared or ultrasonic radiation, or sound, to detect the presence of humans and switch the lights accordingly. Occupancy sensors are an effective energy-saving measure.

Power Supply

A piece of electronic equipment that transforms the main supply voltage into a lower DC voltage that is appropriate for LED lighting. Some LED fixtures have a built-in power supply, while others require one to be connected externally. Also called a driver.

Reflected Light

Various surfaces in a space reflect between 1% and 95% of the light from a source. Smooth surfaces bounce light to a greater degree, while rough, irregular, or matte surfaces scatter or absorb it.

Receiver (for Wireless switching and dimming)

A device that is wired in between the power supply and the LED light fixtures. It "receives" the RF signals from the remote, or wireless, Controller to turn lights on, off or to dim.

Retrofit

A lighting system upgrade, generally with the goal of improving energy efficiency, site safety, and ambiance, for example, replacing an incandescent bulb with an LED light in a ceiling can.

Soft White

A light source with a Kelvin temperature of around 3000K. Light sources at this color temperature value have a bright output with a slight yellow hue similar to incandescent bulbs.

Solid State Lighting (SSL)

A type of lighting that uses semi-conductor light emitting diodes (LEDs) or organic light emitting diodes (OLED) as sources of illumination rather than incandescent, plasma, or gas lamp sources.

Spec (Specification) Sheets

Contain detailed product information including dimensions, technical information, application notes, etc.

Task Lighting

Lighting fixtures that improve visibility in an area where specific tasks will be carried out. The use of under cabinet lights for food preparation areas in kitchens is an example of task lighting.

Translucent

An object or material that allows light to pass through but diffuses and softens the light source or individual diodes.

Tunable

Tunable white lighting technology is defined as the ability to control a light source's color temperature output.

Task Lighting

Glossary of Terms

UL

Underwriters Laboratory, a private organization that tests and lists electrical (and other) equipment for fire safety, according to recognized UL and other standards. It is a trusted resource across the globe for product safety certification and compliance solutions.

UL Label

A label indicating approval by Underwriters Laboratories, which means a product has been tested for fire safety and electrical safety.

UL Listing

A certification that means Underwriters Laboratory has tested representative samples of a product and determined that the product meets specific, defined requirements that are based on UL's published and nationally recognized Standards for Safety.

Ultraviolet (UV) Radiation

A type of energy produced by the sun or artificial sources such as light fixtures. Through a complex process, UV rays transform the water found in all textiles into hydrogen peroxide (bleaching agent) that leads to the fading of colors and the integrity of the textiles. LEDs produce such a low level of UV that it is considered imperceptible.

Voltage

It is the pressure from an electrical circuit's power source that pushes charged electrons (current) through a conducting loop and is measured in volts. Voltage drives electric current through lighting fixtures just as pressure drives the flow of water through a hose.

Voltage Drop

Voltage drop is defined as the amount of voltage loss that occurs through all or part of a circuit due to electrical resistance. Wires, electrical components and virtually anything carrying current always has inherent resistance to current flow. It's important to consider voltage drop when specifying LED lighting as the LED power supply is generally installed in a remote location aside from the fixtures. There will be some voltage drop due to the wiring between the power supply and the lighting itself.

Warm White

White light that is characterized by a yellow tinge. The term is generally used for lighting with a Kelvin temperature of around 2700K.

Watt

A unit of electrical power which indicates the rate at which energy is consumed by a fixture. In lighting, lumens can be compared to miles traveled and watts can be compared to fuel consumption.

Zone (for LED Lighting)

A lighting application that is controlled separately from other lighting applications, such as under cabinet lighting, interior cabinet lighting, toe kick lighting, etc., so that each can be turned on or off or dimmed independently of the other applications. For Wireless Control, each Zone requires a separate Receiver. For hard wire control, each Zone requires a separate hard wire dimmer.

You Buy. You Try. You Decide.

Place a Trial Order any new-to-you Task Lighting products and try them out. If you're not satisfied we'll take them back. Guaranteed!

How the Trial Order program works

1. Place a Trial Order for any LED lighting products. Trial Orders can be combined with a regular order. We pay the freight on Trial Orders.
2. Test the products risk-free.
3. If you're not completely satisfied, call us. We'll give you immediate full credit on the Trial Order purchase. We'll arrange for the products to be picked up later – no need to save the original packaging, ship them back, etc. We make it easy. We would appreciate hearing your observations on the products.

How to order

1. Call **800-445-6404**
2. Use code **TRIAL-TASKLIGHTING** for the Trial Order products

Hardware Resources believes in quality, integrity, and reliability. We uphold the highest standards of service and responsibility in the industry.

As such, Hardware Resources warrants all Task Lighting & Task Power products and Task Lighting & Task Power accessory products against defects in material and workmanship brought to our attention within FIVE years after purchase, if the original consumer purchased the products from an authorized distributor of Hardware Resources. Hardware Resources cannot guarantee the quality or condition of products from distributors who do not agree to meet our high standards, and therefore, no warranty is provided for products from unauthorized sellers.

If a defect is found within a certain time-frame (illumLED – 3 years, sempriaLED – 5 years, Task Power – 5 years), Hardware Resources will send to the original purchaser a new replacement product or component at no charge. If a replacement is no longer available, Hardware Resources will offer a replacement fixture or component that is comparable to the original product's purchased price.

This warranty is a warranty of replacement only. Hardware Resources specifically does not warrant removal of the product nor installation of replacement new product. This warranty does not apply when the item has been tampered with, misused, improperly installed (use of incorrect voltage, use of incorrect wire size and type), or damaged through improper cleaning, abuse or accident. This warranty does not apply to slight variation in Kelvin temperature, normal in selection of LED diodes.

In the unlikely event that a defective Task Lighting or Task Power product, or a defective Task Lighting or Task Power accessory product is encountered, please contact Customer Service at 800-445-6404. Please be able to provide a brief description and photographs of the defect.
