

Replacement TEC 830 to Tec 864

The Tec 8630 hinge has been discontinued.

You can use the TEC 864 as a replacement.

Step 1: Identify your replacement hinge:

Look for a number on the base plate (part that attaches to the cabinet)

It should read 830-XX where XX could be 33, 40, etc. (see below)

IMPORTANT:

The two screw holes that fasten the hinge will not line up with your existing screw holes, but the hinge and base plate (one piece now) will work fine.

Antique bronze finish is also no longer available.

The replacement hinge is only sold in zinc finish.
