

**NEXIS**

**G\*GRASS®**

## **NEXIS HINGE SYSTEMS**

Our versatile hinge systems offer added value through a number of design solutions, proven technology, functionality and operating comfort.

Efficient and reliable. The versatile Nexis hinge system offers snap-on installation technology for a variety of cabinetry applications with a Soft-close or Self-close closing action.

**Reliable Snap-on hinges with opening angles from 95° to 170° for long-lasting everyday service**

The Nexis hinge series offers a wide variety of hinges for standard door applications, specialty door applications, and frame and frameless applications. Opening angle ranging from 95° to 170°, Nexis is offered in a screw-on and dowelled version in a 42mm, 45mm, 48mm boring pattern and the Nexis Impresso, tool-free installation, is offered in a 42/45mm and 45/48mm boring pattern.

Nexis Snap-on hinges attach to Nexis base plates with an audible click. Installation is user-friendly and reliable. Just pressing down the hinge with a finger is enough to attach it to the base plate. The hinge can be detached from the Snap-on base plate by simply releasing it with the lever at the front of the hinge arm.

## NEXIS HINGE SYSTEM

Snap-on technology:  
Quick mounting, efficient, secure.

**Nexis Impresso**  
**Quick, simple and reliable**  
**hardware without tools.**

The Nexis Impresso hinge series is designed to assemble quickly and easily without tools. This is especially useful in cabinetry that is flat-packed and shipped unassembled with pre-drilled doors.

The Nexis Impresso hinge can be installed quickly and accurately on site. Simply insert the Nexis Impresso hinge into the bored door and close the hinge flap to engage. The hinge sits firmly and securely in the door and does not allow for twisting due to a 3 point connection of the hinge cup to the door.

The Nexis Impresso is perfect for door material such as particle board, solid wood, and MDF board.

**Hinge cup with 'combination'**  
**drilling pattern.**

All Impresso hinges are offered in a combination drilling pattern. Available combinations include a 42mm/45mm pattern and a 45mm/48mm pattern. Any Nexis Impresso hinge cup is suitable for at least two drilling patterns and covers all boring patterns offered in today's market.

**Nexis - Proven technology**  
**makes Nexis the classic choice**  
**among hinge systems.**

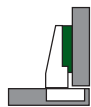

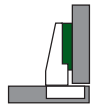

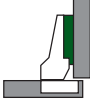

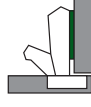

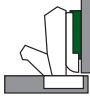

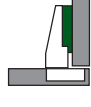

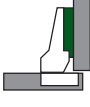

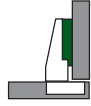

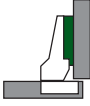

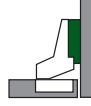

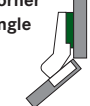

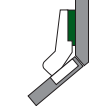

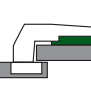

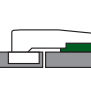

The Nexis hinges series offers added value through a number of design solutions that will meet any application requirements whether it be frame or frameless. Choose from hinge opening angles ranging from 95° to 170° and from hinges designed for special applications such as negative angle and pie cut corner applications.

The Nexis series is available in a screw-on or dowelled version and is offered in a 42mm, 45mm, and 48mm boring pattern. The Nexis base plates offer cam adjustment,

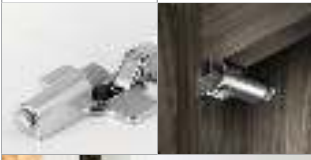

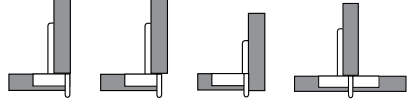

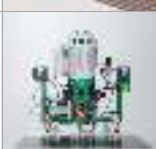

3 point fixing, screw-on or Euro screw versions for frame and frameless cabinetry. The plates mount easily in a user friendly snap-on method. Just one push connects the hinge to the plate.

**Add a touch of innovation**  
**with the unique Soft-close®**  
**controlled closing device to bring**  
**a calming quiet to closing doors.**

During the closing action, the Soft-close creates a cushion that controls and slows the door to a gentle stop. The Soft-close device attaches easily without tools for a simple installation.

# Features and Benefits

## Nexis

### Features

- Opening angles from 95° to 170°
- Tool-free Soft-close option
- Combination drilling patterns for Impresso
- Specialty applications for angled and pie cut doors
- Tipmatic options are available

**Height adjustment ( $\pm 2\text{mm}$ )**  
via cam base plate

**Tool-free Soft-close option**  
cushion control for a slow gentle stop

## Features

- 3-dimensional adjustment with suitable base plate
  - Depth adjustment  $\pm 3/-1\text{mm}$
  - Height adjustment  $\pm 2\text{mm}$
  - Side adjustment  $\pm 1/-3\text{mm}$
- For face frame or frameless cabinets
- Impresso for tool-free application
- 42mm, 45mm, and 48mm boring patterns

Technical Information

Nexis

Number of Hinges per Door

The number of hinges is determined by the door height, door weight, quality of the material and the fixing of the cup and base plate.

The load and height data refer to 24" standard door widths.

The table refers to hinges with and without integrated dampers.  
Grass strongly recommends a trial mount for all hinges and base plates.

Attach base plates using all available screw holes.

Example:  
For doors measuring 56" x 24" and weighing 19 lbs., Grass recommends the installation of 3 hinges.

Note: The distance between the top and bottom hinge must be greater than the width of the door.

The **Nexis** hinge meets and exceeds the minimum requirements of ANSI/BHMA A156.9 Standard.

Nexis Drilling Patterns

Nexis Impresso Drilling Patterns

**Impresso 42/45** hinges accommodate cup drilling patterns of both 42mm and 45mm.  
**Impresso 45/48** hinges accommodate cup drilling patterns of both 45mm and 48mm.

## Adjustments

The options for height adjustment depend on the type of base plate. All adjustments can be made independent of one another.

For depth adjustment, select base plates have cam adjustment access through the hinge arm.

Use a #2 POZI drive screwdriver for hinge adjustments.

**Attach base plates using all available screw holes.**

Side adjustment

Depth adjustment

Height adjustment

## Reveal

### Full Overlay Door

### Half Overlay Door

### Inset Door

**The reveal (R)** is the distance required between two doors or between the door and side wall of the cabinet to allow sufficient space for opening the door. The required reveal width (R) depends on the thickness of the door.

Most cabinet makers prefer a reveal (R) of between 3mm and 6mm.

## Reveal for Overlay and Half Overlay Door

The table shows the reveal necessary between two doors or between door and side wall to allow enough space for opening the door.

### Example:

For a door thickness of 18mm and a drilling distance of 6mm, a gap of 0.2mm is needed.

|    | Drilling Distance (DD) |     |     |     |  |
|----|------------------------|-----|-----|-----|--|
|    | 3                      | 4   | 5   | 6   |  |
| 16 | 0.1                    | 0.1 | 0.1 | 0.1 |  |
| 18 | 0.2                    | 0.2 | 0.2 | 0.2 |  |
| 19 | 0.3                    | 0.3 | 0.3 | 0.3 |  |
| 20 | 0.4                    | 0.4 | 0.4 | 0.4 |  |
| 22 | 0.7                    | 0.7 | 0.7 | 0.7 |  |
| 24 | 1.0                    | 1.0 | 1.0 | 1.0 |  |
| 26 | 1.4                    | 1.4 | 1.4 | 1.4 |  |
| 28 | 1.9                    | 1.9 | 1.9 | 1.9 |  |
| 30 | 3.8                    | 2.9 | 2.6 | 2.5 |  |
|    | Reveal min. (R)        |     |     |     |  |

## Reveal for Inset Door

The table shows the minimum reveal for an inset door, depending on the drilling distance and base plate height.

**Example:** A drilling distance of 4mm results from using a base plate with height 04 in a reveal of 2mm.

|   | Drilling Distance (DD)  |   |   |   |  |
|---|-------------------------|---|---|---|--|
|   | 3                       | 4 | 5 | 6 |  |
| 0 |                         | 2 |   | 4 |  |
| 1 | 2                       |   | 4 |   |  |
| 2 |                         | 4 |   |   |  |
|   | Base Plate Height (BPH) |   |   |   |  |

### Note:

Reveal dimensions were determined with a door edge radius of 1mm. Hinge dimensions and calculation of gap with factory setting.

### IMPORTANT

To determine the correct application Grass strongly recommends a trial mounting for all hinges and base plates.

Technical Information

Nexis

Minimum GapDrilling Distance

The **Minimum gap** is the gap between the closed door and the front of the cabinet.

| Drilling Distance (DD) |   | Cup Center (CC) |      |
|------------------------|---|-----------------|------|
| 1/8"                   | 3 | 13/16"          | 20.5 |
| 5/32"                  | 4 | 27/32"          | 21.5 |
| 3/16"                  | 5 | 7/8"            | 22.5 |
| 1/4"                   | 6 | 15/16"          | 23.5 |
| 9/32"                  | 7 | 31/32"          | 24.5 |
| 5/16"                  | 8 | 1"              | 25.5 |

The **drilling distance (DD)** is the distance between the edge of the door and the edge of the cup hole.

The **cup center** is the distance of the cup drilling distance plus 1/2 of the cup diameter.

**Example:**  
For a door thickness (DT) of 26mm and a drilling distance (DD) of 6mm a minimum gap of 0.7mm is needed.

| Door Thickness (DT) | Drilling Distance (DD) |     |     |     |     |             |
|---------------------|------------------------|-----|-----|-----|-----|-------------|
|                     | 3                      | 4   | 5   | 6   |     |             |
|                     | 16                     | 0.5 | 0.5 | 0.5 | 0.5 |             |
|                     | 18                     | 0.5 | 0.5 | 0.5 | 0.5 |             |
|                     | 19                     | 0.5 | 0.5 | 0.5 | 0.5 |             |
|                     | 20                     | 0.0 | 0.0 | 0.0 | 0.5 |             |
|                     | 22                     | 1.4 | 2.4 | 3.4 | 0.5 |             |
|                     | 24                     | 0.5 | 0.5 | 0.5 | 0.5 |             |
|                     | 26                     | 0.5 | 0.5 | 0.5 | 0.7 |             |
|                     | 28                     | 0.5 | 0.5 | 0.5 | 0.9 |             |
|                     | 30                     | 0.5 | 0.5 | 1.1 | 1.1 |             |
|                     |                        |     |     |     |     | Minimum gap |

Door Overlay

The **door overlay** is the part of the cabinet side wall or face frame that is covered by the door on the hinge side.

**Example:**  
For a hinge with a cranking of 00, a base plate height (BPH) of 2mm, and a drilling distance (DD) of 4mm, the door overlay is 15mm.

| Door Overlay | Drilling Distance (DD) |   |   |   |   |                         |
|--------------|------------------------|---|---|---|---|-------------------------|
|              | *3                     | 4 | 5 | 6 | 7 |                         |
|              | 20                     |   |   |   | 0 |                         |
|              | 19                     |   |   | 0 |   |                         |
|              | 18                     |   | 0 |   | 2 |                         |
|              | 17                     | 0 |   | 2 |   |                         |
|              | 16                     | 0 | 2 |   | 4 |                         |
|              | 15                     |   | 2 | 4 |   |                         |
|              | 14                     | 2 |   | 4 |   |                         |
|              | 13                     |   | 4 |   |   |                         |
|              | 12                     | 4 |   |   |   |                         |
|              |                        |   |   |   |   | Base Plate Height (BPH) |

Door Edge Protrusion

The **door edge protrusion** is the amount by which the edge of the open door protrudes into the opening and varies depending on the type of hinge and method of fixing. It is stated on the respective catalog page and refers to the stated base plate for the factory setting. It can be changed by changing the height of the base plate and adjusting the lateral adjustment.

## Door Positions

### Achieve overlay with hinge cranking

#### Full Overlay (Cranking 00)

The cup overlay (factory setting) plus drilling distance determine the door overlay. Dimensions can be found in a table on the respective page of the catalog.

### Or Achieve overlay with base plate

#### Full Overlay

Using a hinge with a cranking of 00 and a base plate height (BPH) 00

#### Half Overlay (Cranking 08)

The cup overlay (factory setting) plus drilling distance determine the door overlay. Dimensions can be found in a table on the respective page of the catalog.

#### Half Overlay

Using a hinge with a cranking of 00 and a base plate height (BPH) 8.0

#### Inset (Cranking 15)

There is no door overlay. The reveal between the side of the cabinet and the door depends on the base plate height (BPH) and the drilling distance (DD). Dimensions can be found in a table on the respective page of the catalog.

#### Inset

Using a hinge with a cranking of 00 and a base plate height (BPH) 18

# Insertion Instructions

## Nexis 85° Reduction Clip

85° Reduction Clip

| Description              | Material      | Item No.        | PU   |
|--------------------------|---------------|-----------------|------|
| 85° angle reduction clip | Black plastic | 641.000.10.9862 | 1000 |

**Note:** Nexis 85° Reduction Clip for standard 110° and 125° hinges

PU - Packaging unit

Instructions for 85° Angle Reduction Clip

Begin with hinge in the open position and not mounted on door.

With needle-nosed pliers grip sides of clip.

Insert clip over the roll pin.

Push clip in as you start to close hinge.  
Clip will snap into place.

Hinge opening angle is reduced to 85.

# Testing Information

## Nexis

### Functional Test

#### Static load - vertical

Additional load: 44 pounds (20 kg)

Opening angle: max.  $-10^{\circ}$

#### Static load - horizontal

Force: 40 N

#### Endurance Test

Opening angle: max.  $-5^{\circ}$

Open and close movements: 100,000

### Overload Testing

#### Vertical

Additional load: 66 pounds (30 kg)

Opening angle: max.  $-10^{\circ}$

#### Horizontal

Force: 80 N

#### Test door

Weight approx. 11.5 pounds (5.2 kg)

### Salt Spray and Humidity Test

Based on DIN ISO 9227 and DIN 6270-2

# Nexis 110

## 110° hinge for standard doors

- 3-dimensional adjustment with suitable base plate
- Soft-close compatible
- Shallow cup depth
  - Nexis Impresso 11.5mm
  - Nexis 11mm
- Accommodates overlays up to 20mm (25/32")
- Self-close or free-swing hinges available
- For face frame and frameless cabinets
- Combination drilling pattern for Nexis Impresso

### Nexis 110 Opening Angle 110°

|                        | Reveal Min. (R) |     |     |     |     |     |  |

**Note:** Reveal dimensions were determined with an edge radius (of the door) of 1mm. Hinge dimensions and reveal calculation based on factory setting.

#### IMPORTANT

To determine the correct application Grass strongly recommends a trial mounting for all hinges and base plates.

### Cup Dimensions

# Nexis 125

## 125° hinge for standard doors

- 3-dimensional adjustment with suitable base plate
- Soft-close compatible
- Accommodates overlays up to 19mm (3/4")
- For door thickness up to 19mm (3/4")
- Alternative solution for wide angle application
- Self-close hinges available
- For face frame and frameless cabinets
- Combination drilling pattern for Nexis Impresso

| 19 | 4.6                    | 3.6 | 3.0 | 2.9 |  |  |
| 20 | 6.5                    | 5.5 | 4.5 | 3.5 |  |  |
|    |                        |     |     |     |  |  |
|    |                        |     |     |     |  |  |
|    | Reveal Min. (R)        |     |     |     |  |  |

**Note:** Reveal dimensions were determined with an edge radius (of the door) of 1mm. Hinge dimensions and reveal calculation based on factory setting.

### IMPORTANT

To determine the correct application Grass strongly recommends a trial mounting for all hinges and base plates.

## Legend

BPH = Base Plate Height  
CC = Center Cup  
DD = Drilling Distance  
DT = Door Thickness  
R = Reveal

## Cup Dimensions

Nexis

Nexis Impresso

# Nexis 170

## 170° wide-angle hinge

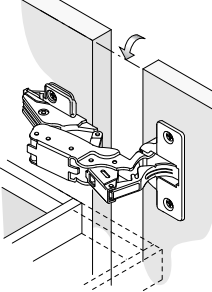

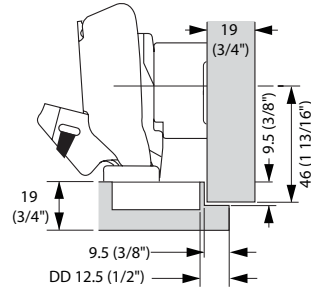

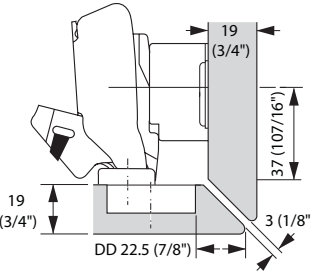

- 3-dimensional adjustment with suitable base plate
- Soft-close compatible
- Accommodates overlays up to 19mm (3/4")
- Shallow cup depth (11mm) for Nexis and Nexis Impresso
- Zero protrusion when door opened 90°
- Finger protection
- Self-close or free-swing hinges available
- For face frame and frameless cabinets
- Combination drilling pattern for Nexis Impresso

### Cup Dimensions

Nexis

Nexis Impresso

# Nexis 95

## 95° hinge for thick or profile doors

- 3-dimensional adjustment with suitable base plate
- Soft-close compatible
- Accommodates overlays up to 19mm (3/4")
- Minimal gap dimensions on thick doors
- For door thickness up to 30mm (1 3/16")
- Self-close or free-swing hinges available
- For face frame and frameless cabinets

### Cup Dimensions

## Nexis 95/40

95° hinge with 40mm cup for profile doors

- 3-dimensional adjustment with suitable base plate
- Accommodates door overlays up to 23mm (7/8")
- Minimal gap dimensions on thick doors
- Excellent weight capacity for heavy profile doors
- For profile or frame doors up to 36mm thick
- Special spring mechanism ensures excellent closing force - even with large doors
- Self-close hinges available
- For face frame and frameless cabinets

|                     |    | Reveal Min. (R)        |     |     |     |  |

Note:

\*3mm drilling distance for Nexis only

A door stop is needed to prevent over close.

**Note:** Reveal dimensions were determined with an edge radius (of the door) of 1mm. Hinge dimensions and reveal calculation based on factory setting.

### IMPORTANT

To determine the correct application Grass strongly recommends a trial mounting for all hinges and base plates.

## Overlay

| Drilling Distance (DD) | Door Overlay |

| Minimum reveal (R) |                        |      |  |  |

Hinge dimensions and reveal calculation based on factory setting.

\*Minimum reveal for doors with beveled edges (R= 1 mm) (factory setting).

## NEXIS SOFT-CLOSE

Add a touch of luxury to your cabinet door

**Soft-close, a unique controlled closing device, can be fitted on to the Nexis Impresso and Nexis hinges.**

**The Soft-close adds a cushion that controls and slows the door to a gentle, quiet stop.**

**Soft-close® for Nexis Impresso and Nexis. The unique shock absorber system for cabinet doors.**

The elegant design and state of the art technology of the Nexis Soft-close make the perfect combination for the Nexis Impresso and Nexis hinge series.

Perfect for any application or situation where you want the doors to operate quietly on any type of flat panel door. Adding the Soft-close damper to your doors creates a cushion effect that controls and slows the door closing to a gentle stop. The number of Soft-close dampers per door depends on its size and weight. The Soft-close attaches easily without tools and can be added right from the start or as an addition later on.

**UniSoft, Soft-close adapter**

The UniSoft works for the Nexis Impresso and Nexis full overlay applications on flat panel doors and 5 panel doors. The UniSoft mounts independently from the hinge in the upper corner of your cabinet.

Its brushed nickel look blends well with the hinge finish. The UniSoft can be adjusted by the turn of a screw to the desired closing speed. The UniSoft can be installed at any time during the production process or by the end user after the cabinetry is installed.

## Soft-close 170°

For Nexis Impresso 170° and Nexis 170° wide-angle hinges

- Soft-close adapter for 170° wide-angle hinges
- Slows door action, to close quietly
- Simply snap in place
- Completely tool-free
- Perfect retrofit solution

### Soft-close 170°

Soft-close adapter for Nexis Impresso 170° and Nexis 170° wide-angle hinges with pre-mounted Soft-close damper

| Item No.        | PU  |
|-----------------|-----|
| 924.200.46.1115 | 125 |

### Installation

### Recommended Position for Soft-close Nexis

- Recommended position for Soft-close
- ⦿ Position for additional Soft-close (where required)

### IMPORTANT NOTE

The installation of our cabinetry hardware must comply with the Grass instructions that are stated in our available sales brochures; otherwise, Grass cannot be held liable. The company cannot accept any liability in the case of incorrect installation handling. If further information regarding installation and assembly is needed, please contact our factory directly.

# Soft-close Nexis Impresso

For Nexis Impresso 95°, 100°, 110°, and 125° hinges

- Soft-close adapter for Nexis Impresso hinges
- Slows door action, to close quietly
- Quick and easy to attach
- Completely tool-free
- Damping force can be individually adjusted
- Best suited for flat panel doors

## Soft-close Impresso

| Cover cap for hinges - cranking 00 | Steel, nickel-plated | 514.300.21.0215 | 1000 |

Cover caps Soft-close compatible.

## Installation Instructions for Soft-close Impresso

### Soft-close® Impresso

Check for locator pins to verify Soft-close compatibility.

The installation of our cabinetry hardware must comply with the Grass instructions that are stated in our available sales brochures; otherwise, Grass cannot be held liable. The company cannot accept any liability in the case of incorrect handling. If further information regarding installation and assembly is needed, please contact our factory directly.

**NOTE:** For recommended position of Soft-close, please see page 41.

1. Take door off the cabinet, remove cover cap (if installed) on 00 cranking hinges, open flap of hinge cup.
2. Insert Soft-close Impresso adapter onto locator pins which are attached to the hinge cup.
3. Close Impresso flap of hinge cup completely. 4 Insert Soft-close damper completely into Soft-close adapter with the flattened side pointing down.
4. Mount cabinet door to base plates Mount cover cap on hinge if desired (cover cap is included in set).
5. Adjust Soft-close Impresso if necessary via adjustment screw.
6. For flat panel doors.

| Cover cap for hinges - cranking 00 | Steel, nickel-plated, without imprint | 514.300.21.0215 | 1000 |

Cover caps Soft-close compatible.

## Installation Instructions for Soft-close

### Soft-close® Nexis

Check for notches to verify Soft-close compatibility.

The installation of our cabinetry hardware must comply with the Grass instructions that are stated in our available sales brochures; otherwise, Grass cannot be held liable. The company cannot accept any liability in the case of incorrect handling. If further information regarding installation and assembly is needed, please contact our factory directly.

**NOTE: For recommended position of Soft-close, please see page 41.**

1. Remove cover cap (if installed) on 00 cranking hinges.
2. Insert Soft-close Nexis adapter into notches located on the sides of the hinge cup and attach adapter.
3. Press both sides of the adapter downward until you hear a noticeable "click".
4. Mount cover cap on hinge if desired (cover cap is included in set).
5. Adjust Soft-close Nexis if necessary via adjustment screw.
6. Use cover for hinge cup (included in set) for the hinge without Soft-close Nexis to achieve a uniform appearance.

Soft-close for doors

- Works for face frame cabinets on all door overlays
- Works for frameless cabinets on full overlay doors
- Brushed nickel look blends in well with hinge finish
- Non-handed with a low profile design
- Manually adjustable to desired closing speed
- Mounts independently from the hinge in the upper corner of the cabinet
- Instantly allows the cabinet door to close quietly and smoothly
- Scratch protector and front bumper with cushion for a quiet close

Unisoft Adapter

| Description           | Material        | Item No. | PU  |
|-----------------------|-----------------|----------|-----|
| Unisoft, Polybag      | Plastic, chrome | 18971-37 | 1   |
| Unisoft, Polybag Bulk | Plastic, chrome | 18971-40 | 25  |
| Unisoft, Bulk         | Plastic, chrome | 18971-14 | 250 |

Includes #6 x 3/4 Pan head screw

Installation      Mounting Position      Adjustment

Use a 65° angle for best base results. Pilot drill 2.3mm (Ø3/32") and 1/4" deep for a #6 x 3/4" Pan head screw recommended. Mount in upper corner on hinge side.

**IMPORTANT** The installation of our cabinetry hardware must comply with the Grass instructions that are stated on this catalog page.

Turn adjustment screw to move damper in and out. Adjust in for heavier doors or out for light doors. Use Phillips or Pozidrive screwdriver or adjust manually.

Dimensions      UniSoft per Door

Use one UniSoft for most applications. For heavier doors use two or more. Trial mount recommended.

UniSoft   Hinges

## TIPMATIC PLUS

A gentle push and the doors seemingly open automatically

**This exclusive solution for handle-free cabinet doors will turn any cabinetry into something special.**

Tipmatic for the Nexis hinge series adds a new element for handle free doors. A gentle tap on the door is enough pressure to open the cabinet door to a convenient angle, making it comfortable and easy to grip the handle free door panel and open it further.

When closing the door, another gentle push activates the magnets and keeps the doors closed. The Tipmatic Plus is the perfect solution when designing cabinetry without handles for a clean, modern design. The Tipmatic Plus is compatible with all Nexis free-swinging hinges and can be used with wood doors and glass doors.

The Tipmatic Plus consists of a Tipmatic adapter, Tipmatic ejector, magnetic pin, and counter plate. The Tipmatic can be installed on the hinge without the use of any tools. The magnetic pin is installed on the interior of the cabinet while the counter plate is glued or screwed onto the cabinet door.

# Tipmatic Plus

For Nexis free swing hinges

- Gently tapping the front causes the doors to open to a convenient angle
- Compatible with all free-swing hinges in the Nexis series
- Perfect retrofit solution

## Tipmatic Plus Set

- 1 set consists of:**
- 1 Tipmatic Plus adapter
  - 1 Tipmatic Plus ejector
  - 1 counterplate for gluing
  - 1 counterplate for screw fixing incl. screw
  - 1 magnetic pin

| Item No.        | PU |
|-----------------|----|
| 924.275.40.0315 | 25 |

## Face Frame or Standard Adapter Plate

- Quick upgrade installation
- Attach with wood screws (3.5 x 13)
- Plastic RAL 7035, light grey

| Item No. | PU |
|----------|----|
| 63311-40 | 25 |

## Linear Adapter Plate

- Design solution – also suitable for inset door applications
- Attach with wood screws (3.5 x 13)
- Plastic RAL 7035, light grey

| Item No. | PU |
|----------|----|
| 63309-40 | 25 |

PU – Packaging unit

## Installation Instructions for Tipmatic Plus

### Tipmatic Plus – quick and easy fitting

1. Remove hinge arm cover cap (where applicable).
2. Insert Tipmatic Plus with the two small hooks underneath into the recesses in the hinge cup, at a slight angle.
3. Push down both sides of the adapter simultaneously until it engages with an audible 'click'.
4. With the flatter side facing downwards, push the Tipmatic ejector fully into the adapter opening.
5. Adjust front gap, put on hinge arm cover cap (where applicable).

## Installation of Tipmatic Plus Adapter Plate

### Frame adapter Plate

Do not use door bumpers.

### Linear adapter Plate

Do not use door bumpers.

## Recommended Position for Tipmatic Plus

- Recommended position for Tipmatic Plus .
- Counterplate position (on the same level as the magnetic pin). One magnetic pin per door.
- ⊙ Recommended position for Tipmatic Plus for wall cabinet applications.
- ⊞ Counterplate position for wall cabinet applications (on the same level as the magnetic pin). One magnetic pin per door.

### IMPORTANT

**Tipmatic Plus is only suitable for Nexis free-swing hinges. Ensure that the surface is clean and fully degreased before gluing the adhesive plate.**

If Tipmatic Plus is used in conjunction with a different hold-closed system, Grass does not provide any guarantees.

The installation of our cabinetry hardware must comply with the Grass instructions that are stated in our available sales brochures; otherwise, Grass cannot be held liable. The company cannot accept any liability in the case of incorrect installation or handling. If further information regarding installation and assembly is needed, please contact our factory directly.

# Tipmatic

## For handle-free wooden doors

- Gently tapping the front causes the doors to open to a convenient angle
- Use with Tiomos Tipmatic Plus or with Nexis and Tiomos free-swinging hinges
- Large magnet catch range – holds door closed securely
- Gap adjustment from 2.5 to 5.5mm with integrated, self-locking and tool-free depth adjustment feature
- Mount on the front side of the cabinet or with an adapter plate

### Tipmatic Pin

- Incl. Tipmatic mechanism:
  - Stick on strike plate
  - Screw on strike plate
- Hole drilled from the front
- Plastic RAL 7036, platinum grey

### For Drilling

| Item No. | PU |
|----------|----|
| 68873-06 | 25 |

### Adapter Plate for Line Boring

- Suitable for line boring 28 and 37mm
- Attach with Euro screws (6.3 x 13.5)
- Plastic RAL 7035, light grey

### For Euro Screws

| Item No. | PU |
|----------|----|
| 63310-40 | 25 |

## INSTITUTIONAL HINGES

### **Designed for high use environments**

Grass Institutional Hinges offer the perfect solution for institutional casework in schools, hospitals, commercial, and furniture environments where the cabinetry has a considerable amount of use. Distinguished by its outstanding durability based on all metal construction, this institutional hinge system is designed for frameless cabinetry and offers high load weight bearing capabilities.

Form. Fit. Function. Engineered to exceed your expectations. Its sturdy design makes it your first choice in institutional cabinetry hardware.

# Institutional Hinge

## Technical Information

### Hinge Insertion

A slight press with the thumb securely connects the door with the cabinet.

### Hinge Removal

Use flathead screwdriver to remove hinge arm from hinge cup with a simple twist.

### Adjustments

#### Height Adjustment

1. Loosen fixing screw.
2. Adjust door  $\pm 2$  mm up and down.
3. Tighten fixing screw.

#### Side Adjustment

1. Adjust door 2mm out via Cam adjustment

### Number of Hinges per Door

The number of hinges required depends on the size and weight of the door. The distance between the hinges should be spaced as wide as possible.

Use the diagram to determine the number of hinges needed. These recommendations are for doors without accessory attachments.

# Institutional Hinges

## MB series barrel hinge

- Hinges made of zinc die-cast construction for extreme durability
- Recommended for side panel thicknesses of 19mm (3/4")
- Tool-free snap-on mounting - quick and easy installation
- All types of hinge mounting (corner and center wall)
- Side-to-side adjustment of - 2mm (1/16")
- Height adjustment of +/- 2mm (1/16")
- Cover cap conceals mounting screws
- Available in black and nickel plated
- Designed for frameless cabinet construction
- Opening angles range from 180° to 270°
- \*Meets ANSI/BHMA A156.9 - Grade I requirements

### How to specify institutional hinge hardware:

1. Choose screw-on or dowelled cup: one cup fits all hinge arms.
2. Choose hinge arm based on application (cover cap included).
3. Special #6.3 x 13.5mm Euro screws (2) required for hinge arm mounting. Must be ordered separately.

| 2 PCC hinges (13127-01) | 1 strike plate      |
| 1 magnetic catch        | 1 instruction sheet |

### Door Sizing Example

| Door Sizing Example     |                |
|-------------------------|----------------|
| Overall cabinet opening | 305mm          |
| -Reveal                 | 3mm            |
|                         | =302mm         |
| -2mm gap for bumper pad | 2mm            |
|                         | =300mm         |
| - Door Thickness        | 19mm           |
|                         | =281mm         |
| -1mm Gap between doors  | 1mm            |
| <b>Door Size</b>        | <b>= 280mm</b> |

**Note:**  
Use a POZdrive screwdriver for hinge adjustment.  
Fastening screws for hinge: #6 x 5/8" FHP (not included)  
Fastening screws for catch: #4 x 5/8" FHP (not included)

**IMPORTANT**  
To determine the correct application Grass strongly recommends a trial mounting for all hinges and base plates.

### Mounting Measurements for Flap Hinge

## Hinges per Door

Fixing of flap and base parts using chip board screws  
Ø 3 x 13 mm (screws not included).

|                     |     |     |     |     |     |     |     |
|---------------------|-----|-----|-----|-----|-----|-----|-----|
|                     |     |     |     |     |     |     |     |
| Flap thickness (DT) | 14  | 15  | 16  | 17  | 18  | 19  | 20  |
| Gap min. (R)        | 0.2 | 1.0 | 2.0 | 3.0 | 3.8 | 5.0 | 6.0 |

Hinge dimensions and calculation of gap based on factory setting.

## IMPORTANT

To determine the correct application Grass strongly recommends a trial mounting for all hinges and base plates.

### Cup Dimensions

PU – Packaging unit

# Glass door hinge

## 180° No-bore glass door hinge

- Opening angle 180°
- Direct mounting on cabinet sidewall
- Inset application
- Includes self-adhesive pads
- Thickness of glass: 4-6mm

### No-bore Hinge

| Description              | Location | Material                 | Item No.        | PU  |
|--------------------------|----------|--------------------------|-----------------|-----|
| LA/RB- Left side (above) |          | Hinge cup: diecast;      | 298.705.92.5015 | 250 |
| Right side (below)       |          | Hinge arm: nickel-plated |                 |     |

| Description               | Location | Material                 | Item No.        | PU  |
|---------------------------|----------|--------------------------|-----------------|-----|
| RA/LB- Right side (above) |          | Hinge cup: diecast;      | 298.705.92.5115 | 250 |
| Left side (below)         |          | Hinge arm: nickel-plated |                 |     |

**Note:** product lead time approximately 12 weeks.

### Pull

| Description | Material   | Item No.        | PU  |
|-------------|--|-----------------|-----|
| Pull        | Diecast, nickel-plated fixing with double-sided adhesive pad | 371.290.00.0015 | 250 |

**Note:** product lead time approximately 12 weeks.

### Hinge Dimensions

### Installation

#### Hinge Installation

Stick the double-sided adhesive pad on the corner of the glass door. Peel off the foil. Place the glass door, the side with the pad facing outwards, into the mounted hinge. Tighten the fixing screw.

#### Pull Installation

Stick the double-sided adhesive pad onto the glass door. Peel off the foil. Place the glass door, the side with the pad facing outwards, into the pull. Tighten the fixing screw.

**IMPORTANT** To determine the correct application Grass strongly recommends a trial mounting for all hinges and base plates.

Machinery

GRASS PRO1 drilling and insertion machine for 45mm boring pattern

GRASS PRO1

- Depth stop can be adjusted to material thickness
- Functional design
- Easy, fast and efficient operation
- Easy maintenance
- 45mm boring pattern

| Description                 | Item No. | PU |
|-----------------------------|----------|----|
| 220v single phase pneumatic | 94559-01 | 1  |
| 220v three phase pneumatic  | 94560-01 | 1  |
| 110v single phase pneumatic | 94561-01 | 1  |

GRASS PRO1 Features

**Adjustable hold-down devices**  
Adjustable hold-down devices are suitable for a wide range of material thicknesses. Holds door firmly in place for drilling and insertion and features manual release.

**Pneumatic controls**  
Two-hand start button controls for safe drilling and insertion functions.

**Quick change chucks**  
Easy drill bit removal and insertion using quick change chucks.

PU - Packaging unit

### Drill Bits

| Description | Direction | Item No. | PU |
|-------------|-----------|----------|----|
| 1 35mm bit  | RH        | 00077-01 | 1  |
| 2 8mm bit   | LH        | 00160-01 | 1  |

| American Bit Set for Hinge Drilling | Item No. | PU |
|-------------------------------------|----------|----|
| 1 x 35mm/RH, 2 x 8mm/LH             | 00213-01 | 1  |

### Fence Stops

| Description             | Item No.        | PU |
|-------------------------|-----------------|----|
| 1 Additional fence stop | 949.200.21.0000 | 1  |
| 2 Universal fence stop  | 949.200.21.0100 | 1  |

### Insertion Dies

| Description                               | Item No.             | PU |
|---|----------------------|----|
| 1 Tiomos 110°/120°                        | <b>F146101310201</b> | 1  |
| 2 Universal die for Tiomos 110°/120°/160° | <b>F146101308201</b> | 1  |
| 3 TEC Die for all cup styles              | 92617                | 1  |
| 4 Nexis 110°/125°                         | 04216-01             | 1  |
| 5 Nexis 170°                              | 04218-01             | 1  |

### Extension Fence

| Description                     | Item No. | PU |
|---------------------------------|----------|----|
| Extension fence 400mm to 1650mm | 88612-01 | 1  |
